## June 30, 2023

## Preface

The changes in this revision reflect the following instruments and actions taken since the 2023 HTS Revision 8 was posted:

Notice of the United States Trade Representative, "Notice of Conforming Amendments to Product Exclusion Extensions: China's Acts, Policies, and Practices Related to Technology Transfer, Intellectual Property, and Innovation" (88 F.R. 38120), effective June 1, 2023 (endnotes updated).

Changes approved by the Committee for Statistical Annotation of Tariff Schedules (formulated pursuant to section 484(f), Tariff Act of 1930, as amended), effective July 1, 2023.

Please consult the Change Record for a listing of individual changes in this revision. The Change Record files are NOT cumulative from one electronic revision to the next; it is advisable to retain all change records for the electronic revisions in this calendar year to ascertain the full extent of substantive changes to the HTS.

## GENERAL RULES OF INTERPRETATION

Classification of goods in the tariff schedule shall be governed by the following principles:

1. The table of contents, alphabetical index, and titles of sections, chapters and sub-chapters are provided for ease of reference only; for legal purposes, classification shall be determined according to the terms of the headings and any relative section or chapter notes and, provided such headings or notes do not otherwise require, according to the following provisions:
2. (a) Any reference in a heading to an article shall be taken to include a reference to that article incomplete or unfinished, provided that, as entered, the incomplete or unfinished article has the essential character of the complete or finished article. It shall also include a reference to that article complete or finished (or falling to be classified as complete or finished by virtue of this rule), entered unassembled or disassembled.
(b) Any reference in a heading to a material or substance shall be taken to include a reference to mixtures or combinations of that material or substance with other materials or substances. Any reference to goods of a given material or substance shall be taken to include a reference to goods consisting wholly or partly of such material or substance. The classification of goods consisting of more than one material or substance shall be according to the principles of rule 3.
3. When, by application of rule 2(b) or for any other reason, goods are, prima facie, classifiable under two or more headings, classification shall be effected as follows:
(a) The heading which provides the most specific description shall be preferred to headings providing a more general description. However, when two or more headings each refer to part only of the materials or substances contained in mixed or composite goods or to part only of the items in a set put up for retail sale, those headings are to be regarded as equally specific in relation to those goods, even if one of them gives a more complete or precise description of the goods.
(b) Mixtures, composite goods consisting of different materials or made up of different components, and goods put up in sets for retail sale, which cannot be classified by reference to $3(\mathrm{a})$, shall be classified as if they consisted of the material or component which gives them their essential character, insofar as this criterion is applicable.
(c) When goods cannot be classified by reference to 3(a) or 3(b), they shall be classified under the heading which occurs last in numerical order among those which equally merit consideration.
4. Goods which cannot be classified in accordance with the above rules shall be classified under the heading appropriate to the goods to which they are most akin.
5. In addition to the foregoing provisions, the following rules shall apply in respect of the goods referred to therein:
(a) Camera cases, musical instrument cases, gun cases, drawing instrument cases, necklace cases and similar containers,specially shaped or fitted to contain a specific article or set of articles, suitable for long-term use and entered with the articles for which they are intended, shall be classified with such articles when of a kind normally sold therewith. This rule does not,however, apply to containers which give the whole its essential character;
(b) Subject to the provisions of rule 5(a) above, packing materials and packing containers entered with the goods therein shall be classified with the goods if they are of a kind normally used for packing such goods. However, this provision is not binding when such packing materials or packing containers are clearly suitable for repetitive use.
6. For legal purposes, the classification of goods in the subheadings of a heading shall be determined according to the terms of those subheadings and any related subheading notes and, mutatis mutandis, to the above rules, on the understanding that only subheadings at the same level are comparable. For the purposes of this rule, the relative section, chapter and subchapter notes also apply, unless the context otherwise requires.

## ADDITIONAL U.S. RULES OF INTERPRETATION

1. In the absence of special language or context which otherwise requires--
(a) a tariff classification controlled by use (other than actual use) is to be determined in accordance with the use in the United States at, or immediately prior to, the date of importation, of goods of that class or kind to which the imported goods belong, and the controlling use is the principal use;
(b) a tariff classification controlled by the actual use to which the imported goods are put in the United States is satisfied only if such use is intended at the time of importation, the goods are so used and proof thereof is furnished within 3 years after the date the goods are entered;
(c) a provision for parts of an article covers products solely or principally used as a part of such articles but a provision for "parts" or "parts and accessories" shall not prevail over a specific provision for such part or accessory; and
(d) the principles of section XI regarding mixtures of two or more textile materials shall apply to the classification of goods in any provision in which a textile material is named.
[COMPILER'S NOTE: Multiple sets of changes to the Harmonized System have caused heading and subheading numbers and product coverage in some rules of origin for free trade agreements to be inconsistent with those in current tariff schedule chapters. Negotiations are required to enable agreement partners to update each text, plus domestic actions to implement agreed changes. As a result, the rules of origin provisions for certain United States free trade agreements have NOT been updated since major changes to the HTS were proclaimed. Where not updated for HS changes, be aware that the rule you try to apply may contain HTS numbers as in effect in 2002, 2007 or 2012. You can find U.S. proclamations updating rules in the Federal Register (see annexes for operative language). Changes in rules of origin reflecting HS 2022 modifications are generally not yet negotiated and proclaimed for FTAs.

The new United States-Mexico-Canada Free Trade Agreement, are set forth in terms of HS 2012 and may not contain current tariff numbers for some products. However, the rules for the United States-Australia Free Trade Agreement, the United States-Chile Free Trade Agreement, the United States-Bahrain Free Trade Agreement, and the United States-Korea Free Trade Agreement have been updated to reflect HS 2017, and the pertinent general notes do reflect proclaimed rectifications through 2007 or 2012, depending on the agreement.
Presidential Proclamation 9555 set forth modifications to the rules of origin for the United States-Oman Free Trade Agreement (effective February 1, 2017), the United States-Panama Trade Promotion Agreement (to become effective pursuant to a future Federal Register notice from USTR), and the Dominican Republic-Central America-United States Free Trade Agreement (effective as of November 1, 2020). The United States-Singapore Free Trade Agreement's rules were updated in annex IV to Presidential Proclamation 10053 of June 2020 , effective as of September 1, 2020; and the United States-Colombia Trade Promotion Agreement updates are effective January 1, 2021. Last, the new trade agreement between the United States and Japan (see general note 36 and chapter 99 subchapter XXI) does contain rules of origin that do not appear in the tariff schedule. Consult Customs for guidance if materials have not been posted on their site.

Presidential Proclamations to implement both WCO changes and updates to FTA general notes are posted on the Web site of the United States International Trade Commission, www.usitc.gov, under "Modifications to the HTS."

Contact officials of U.S. Customs and Border Protection in order to ascertain how to apply out-of-date rules and whether affected goods qualify for FTA treatment. A ruling on an individual shipment may be necessary.]

## General Notes

1 Tariff Treatment of Imported Goods and of Vessel Equipments, Parts and Repairs. All goods provided for in this schedule and imported into the customs territory of the United States from outside thereof, and all vessel equipments, parts, materials and repairs covered by the provisions of subchapter XVIII to chapter 98 of this schedule, are subject to duty or exempt therefrom as prescribed in general notes 3 through 36, inclusive.

2 Customs Territory of the United States. The term "customs territory of the United States", as used in the tariff schedule, includes only the States, the District of Columbia and Puerto Rico.

## Harmonized Tariff Schedule of the United States Revision 9 (2023)

3 Rates of Duty. The rates of duty in the "Rates of Duty" columns designated 1 ("General" and "Special") and 2 of the tariff schedule apply to goods imported into the customs territory of the United States as hereinafter provided in this note:
(a) Rate of Duty Column 1.
(i) Except as provided in subparagraph (iv) of this paragraph, the rates of duty in column 1 are rates which are applicable to all products other than those of countries enumerated in paragraph (b) of this note. Column 1 is divided into two subcolumns, "General" and "Special", which are applicable as provided below.
(ii) The "General" subcolumn sets forth the general or normal trade relations (NTR) rates which are applicable to products of those countries described in subparagraph (i) above which are not entitled to special tariff treatment as set forth below.
(iii) The "Special" subcolumn reflects rates of duty under one or more special tariff treatment programs described in paragraph (c) of this note and identified in parentheses immediately following the duty rate specified in such subcolumn. These rates apply to those products which are properly classified under a provision for which a special rate is indicated and for which all of the legal requirements for eligibility for such program or programs have been met. Where a product is eligible for special treatment under more than one program, the lowest rate of duty provided for any applicable program shall be imposed. Where no special rate of duty is provided for a provision, or where the country from which a product otherwise eligible for special treatment was imported is not designated as a beneficiary country under a program appearing with the appropriate provision, the rates of duty in the "General" subcolumn of column 1 shall apply.
(iv) Products of Insular Possessions.
(A) Except as provided in additional U.S. note 5 of chapter 91 and except as provided in additional U.S. note 2 of chapter 96, and except as provided in section 423 of the Tax Reform Act of 1986, and additional U.S. note 3(e) of chapter 71, goods imported from insular possessions of the United States which are outside the customs territory of the United States are subject to the rates of duty set forth in column 1 of the tariff schedule, except that all such goods the growth or product of any such possession, or manufactured or produced in any such possession from materials the growth, product or manufacture of any such possession or of the customs territory of the United States, or of both, which do not contain foreign materials to the value of more than 70 percent of their total value (or more than 50 percent of their total value with respect to goods described in section 213(b) of the Caribbean Basin Economic Recovery Act), coming to the customs territory of the United States directly from any such possession, and all goods previously imported into the customs territory of the United States with payment of all applicable duties and taxes imposed upon or by reason of importation which were shipped from the United States, without remission, refund or drawback of such duties or taxes, directly to the possession from which they are being returned by direct shipment, are exempt from duty.
(B) In determining whether goods produced or manufactured in any such insular possession contain foreign materials to the value of more than 70 percent, no material shall be considered foreign which either--
(1) at the time such goods are entered, or
(2) at the time such material is imported into the insular possession,
may be imported into the customs territory from a foreign country, and entered free of duty; except that no goods containing material to which (2) of this subparagraph applies shall be exempt from duty under subparagraph (A) unless adequate documentation is supplied to show that the material has been incorporated into such goods during the 18 -month period after the date on which such material is imported into the insular possession.
(C) Subject to the limitations imposed under sections 503(a)(2), 503(a)(3) and 503(c) of the Trade Act of 1974, goods designated as eligible under section 503 of such Act which are imported from an insular possession of the United States shall receive duty treatment no less favorable than the treatment afforded such goods imported from a beneficiary developing country under title V of such Act.
(D) Subject to the provisions in section 213 of the Caribbean Basin Economic Recovery Act, goods which are imported from insular possessions of the United States shall receive duty treatment no less favorable than the treatment afforded such goods when they are imported from a beneficiary country under such Act.

## Harmonized Tariff Schedule of the United States Revision 9 (2023)

[(E) Subdivision deleted.]
(F) No quantity of an agricultural product that is subject to a tariff-rate quota that exceeds the in-quota quantity shall be eligible for duty-free treatment under this paragraph.
(v) Products of the West Bank, the Gaza Strip or a qualifying industrial zone.
(A) Subject to the provisions of this paragraph, articles which are imported directly from the West Bank, the Gaza Strip, a qualifying industrial zone as defined in subdivision (G) of this subparagraph or Israel and are--
(1) wholly the growth, product or manufacture of the West Bank, the Gaza Strip or a qualifying industrial zone; or
(2) new or different articles of commerce that have been grown, produced or manufactured in the West Bank, the Gaza Strip or a qualifying industrial zone, and the sum of--
(I) the cost or value of the materials produced in the West Bank, the Gaza Strip, a qualifying industrial zone or Israel, plus
(II) the direct costs of processing operations (not including simple combining or packaging operations, and not including mere dilution with water or with another substance that does not materially alter the characteristics of such articles) performed in the West Bank, the Gaza Strip, a qualifying industrial zone or Israel,
is not less than 35 percent of the appraised value of such articles;
shall be eligible for duty-free entry into the customs territory of the United States. For purposes of subdivision (A)(2), materials which are used in the production of articles in the West Bank, the Gaza Strip or a qualifying industrial zone, and which are the product of the United States, may be counted in an amount up to 15 percent of the appraised value of such articles.
(B) Articles are "imported directly" for the purposes of this paragraph if--
(1) they are shipped directly from the West Bank, the Gaza Strip, a qualifying industrial zone or Israel into the United States without passing through the territory of any intermediate country; or
(2) they are shipped through the territory of an intermediate country, and the articles in the shipment do not enter into the commerce of any intermediate country and the invoices, bills of lading and other shipping documents specify the United States as the final destination; or
(3) they are shipped through an intermediate country and the invoices and other documents do not specify the United States as the final destination, and the articles--
(I) remain under the control of the customs authority in an intermediate country;
(II) do not enter into the commerce of an intermediate country except for the purpose of a sale other than at retail, but only if the articles are imported as a result of the original commercial transactions between the importer and the producer or the producer's sales agent; and
(III) have not been subjected to operations other than loading, unloading or other activities necessary to preserve the articles in good condition.
(C) The term "new or different articles of commerce" means that articles must have been substantially transformed in the West Bank, the Gaza Strip or a qualifying industrial zone into articles with a new name, character or use.
(D) (1) For the purposes of subdivision $(A)(2)(I)$, the cost or value of materials produced in the West Bank, the Gaza Strip or a qualifying industrial zone includes--
(I) the manufacturer's actual cost for the materials;
(II) when not included in the manufacturer's actual cost for the materials, the freight, insurance, packing and all other costs incurred in transporting the materials to the manufacturer's plant;
(III) the actual cost of waste or spoilage, less the value of recoverable scrap; and
(IV) taxes or duties imposed on the materials by the West Bank, the Gaza Strip or a qualifying industrial zone, if such taxes are not remitted on exportation.
(2) If a material is provided to the manufacturer without charge, or at less than fair market value, its cost or value shall be determined by computing the sum of--
(I) all expenses incurred in the growth, production or manufacturer of the material, including general expenses;
(II) an amount for profit; and
(III) freight, insurance, packing and all other costs incurred in transporting the material to the manufacturer's plant.
(3) If the information necessary to compute the cost or value of a material is not available, the Customs Service may ascertain or estimate the value thereof using all reasonable methods.
(E) (1) For purposes of this paragraph, the "direct costs of processing operations performed in the West Bank, the Gaza Strip or a qualifying industrial zone" with respect to an article are those costs either directly incurred in, or which can be reasonably allocated to, the growth, production, manufacture or assembly of that article. Such costs include, but are not limited to, the following to the extent that they are includible in the appraised value of articles imported into the United States:
(I) All actual labor costs involved in the growth, production, manufacture or assembly of the article, including fringe benefits, on-the-job training and costs of engineering, supervisory, quality control and similar personnel;
(II) Dies, molds, tooling and depreciation on machinery and equipment which are allocable to such articles;
(III) Research, development, design, engineering and blueprint costs insofar as they are allocable to such articles; and
(IV) Costs of inspecting and testing such articles.
(2) Those items that are not included as direct costs of processing operations with respect to an article are those which are not directly attributable to the article or are not costs of manufacturing the article. Such items include, but are not limited to--
(I) profit; and
(II) general expenses of doing business which are either not allocable to the article or are not related to the growth, production, manufacture or assembly of the article, such as administrative salaries, casualty and liability insurance, advertising and salesmen's salaries, commissions or expenses.
(F) Whenever articles are entered with a claim for the duty exemption provided in this paragraph--
(1) the importer shall be deemed to certify that such articles meet all of the conditions for duty exemption; and
(2) when requested by the Customs Service, the importer, manufacturer or exporter submits a declaration setting forth all pertinent information with respect to such articles, including the following:
(I) A description of such articles, quantities, numbers and marks of packages, invoice numbers and bills of lading;
(II) A description of the operations performed in the production of such articles in the West Bank, the Gaza Strip, a qualifying industrial zone or Israel and an identification of the direct costs of processing operations;

(C) Foreign trade zone; subzone. The terms "foreign trade zone" and "subzone" mean a zone or subzone established pursuant to the Act of June 18, 1934, commonly known as the Foreign Trade Zones Act (19 U.S.C. 81a et seq.).

(vii) residue of bulk cargo contained in instruments of international traffic previously exported from the United States,
are not goods subject to the provisions of the tariff schedule. No exportation referred to in subdivision (e) may be treated as satisfying any requirement for exportation in order to receive a benefit from, or meet an obligation to, the United States as a result of such exportation. For purposes of subparagraph (vii) of this paragraph: The term 'residue' means material of bulk cargo that remains in an instrument of international traffic after the bulk cargo is removed, with a quantity, by weight or volume, not exceeding 7 percent of the bulk cargo, and with no or de minimis value. The term 'bulk cargo' means cargo that is unpackaged and is in either solid, liquid, or gaseous form. The term 'instruments of international traffic' means containers or holders, capable of and suitable for repeated use, such as lift vans, cargo vans, shipping tanks, skids, pallets, caul boards, and cores for textile fabrics, arriving (whether loaded or empty) in use or to be used in the shipment of merchandise in international traffic, and any additional articles or classes of articles that the Commissioner of U.S. Customs and Border Protection designates as instruments of international traffic.
(f) Commingling of Goods.
(i) Whenever goods subject to different rates of duty are so packed together or mingled that the quantity or value of each class of goods cannot be readily ascertained by customs officers (without physical segregation of the shipment or the contents of any entire package thereof), by one or more of the following means:
(A) sampling,
(B) verification of packing lists or other documents filed at the time of entry, or
(C) evidence showing performance of commercial settlement tests generally accepted in the trade and filed in such time and manner as may be prescribed by regulations of the Secretary of the Treasury,
the commingled goods shall be subject to the highest rate of duty applicable to any part thereof unless the consignee or his agent segregates the goods pursuant to subdivision (f)(ii) hereof.
(ii) Every segregation of goods made pursuant to subdivision (f) of this note shall be accomplished by the consignee or his agent at the risk and expense of the consignee within 30 days (unless the Secretary authorizes in writing a longer time) after the date of personal delivery or mailing, by such employee as the Secretary of the Treasury shall designate, of written notice to the consignee that the goods are commingled and that the quantity or value of each class of goods cannot be readily ascertained by customs officers. Every such segregation shall be accomplished under customs supervision, and the compensation and expenses of the supervising customs officers shall be reimbursed to the Government by the consignee under such regulations as the Secretary of the Treasury may prescribe.
(iii) The foregoing provisions of subdivision (f) of this note do not apply with respect to any part of a shipment if the consignee or his agent furnishes, in such time and manner as may be prescribed by regulations of the Secretary of the Treasury, satisfactory proof--
(A) that such part (1) is commercially negligible, (2) is not capable of segregation without excessive cost and (3) will not be segregated prior to its use in a manufacturing process or otherwise, and
(B) that the commingling was not intended to avoid the payment of lawful duties.

Any goods with respect to which such proof is furnished shall be considered for all customs purposes as a part of the goods, subject to the next lower rate of duty, with which they are commingled.
(iv) The foregoing provisions of subdivision (f) of this note do not apply with respect to any shipment if the consignee or his agent shall furnish, in such time and manner as may be prescribed by regulations of the Secretary of the Treasury, satisfactory proof--
(A) that the value of the commingled goods is less than the aggregate value would be if the shipment were segregated;
(B) that the shipment is not capable of segregation without excessive cost and will not be segregated prior to its use in a manufacturing process or otherwise; and
(C) that the commingling was not intended to avoid the payment of lawful duties.

Any goods with respect to which such proof is furnished shall be considered for all customs purposes to be dutiable at the rate applicable to the material present in greater quantity than any other material.
(v) The provisions of subdivision (f) of this note shall apply only in cases where the tariff schedule does not expressly provide a particular tariff treatment for commingled goods.

(j) Methods of Ascertainment. The Secretary of the Treasury is authorized to prescribe methods of analyzing, testing, sampling, weighing, gauging, measuring or other methods of ascertainment whenever he finds that such methods are necessary to determine the physical, chemical or other properties or characteristics of articles for purposes of any law administered by the Customs Service.

(B) Special rule for certain components.-The following components of the value of nonoriginating materials used by the producer in the production of a good may be counted as originating content for purposes of determining whether the good meets the regional value content requirement set forth in subdivision (c)(ii) or (c)(iii) of this note:
(1) The value of processing the nonoriginating materials undertaken in the territory of one or more USMCA countries; and

## Harmonized Tariff Schedule of the United States Revision 9 (2023)

(v) Net cost method required in certain cases.-An importer, exporter or producer of a good shall calculate the regional value content of a good solely on the basis of the net cost method set out in subdivision (c)(iii) of this note if the rule for the good set forth in subdivision (o) of this note includes a regional value content requirement not based on the transaction value method described in subdivision (c)(ii) above.
(vi) Net cost method allowed for adjustments.
(A) In general.---If an importer, exporter, or producer of a good calculates the regional value content of the good on the basis of the transaction value method described in subdivision (c)(ii) above and a USMCA country subsequently notifies the importer, exporter, or producer, during the course of a verification conducted in accordance with chapter 5 or 6 of the USMCA, that the transaction value of the good or the value of any material used in the production of the good must be adjusted or is unacceptable under article 1 of the Customs Valuation Agreement, the importer, exporter or producer may calculate the regional value content of the good on the basis of the net cost method described in subdivision (c)(iii).
(B) Review of adjustment.-Nothing in paragraph (vi)(A) above shall be construed to prevent any review or appeal available in accordance with article 5.15 of the USMCA with respect to an adjustment to or a rejection of-
(1) the transaction value of a good; or
(2) the value of any material used in the production of a good.
(vii) Calculating net cost.-The producer of a good may, consistent with regulations implementing this note, calculate the net cost of the good under subdivision (c)(iii) of this note by-
(A) Calculating the total cost incurred with respect to all goods produced by that producer, subtracting any sales promotion, marketing, and after-sales services costs, royalties, shipping and packing costs, and nonallowable interest costs that are included in the total cost of those goods, and then reasonably allocating the resulting net cost of those goods to the good;
(B) Calculating the total cost incurred with respect to all goods produced by that producer, reasonably allocating the total cost to the good, and subtracting any sales promotion, marketing and after sales service costs, royalties, shipping and packing costs, and nonallowable interest costs, that are included in the portion of the total cost allocated to the good, or
(C) Reasonably allocating each cost that is part of the total cost incurred with respect to the good so that the aggregate of those costs does not include any sales promotion, marketing, and after-sales services costs, royalties, shipping and packing costs, and nonallowable interest costs.
(viii) Value of materials used in production.-For purposes of calculating the regional value content of a good under this note, applying the de minimis rules under subdivision (e) of this note, and calculating the value of nonoriginating components in a set under subdivision (i) of this note the value of a material used in the production of a good is-
(A) In the case of a material that is imported by the producer of the good-
(1) the transaction value of the material at the time of importation, including the costs incurred in the international shipment of the material; or
(2) if the transaction value of the material at the time of importation is not acceptable or if there is no transaction value in accordance with 19 U.S.C. 1401a, the value of the material must be determined in accordance with the Uniform Regulations with respect to the importation of that material and, if the costs referred to in subsection ( $x$ ) are included in that value, those costs may be deducted from that value.
(B) In the case of a material acquired in the territory in which the good is produced-
(1) The price paid or payable by the producer in the USMCA country where the producer is located;

## Harmonized Tariff Schedule of the United States Revision 9 (2023)

(2) The value as determined under subparagraph (A), as set forth in regulations prescribed by the Secretary of the Treasury providing for the application of transaction value in the absence of an importation by the producer; or
(3) The earliest ascertainable price paid or payable in the territory of the country; or
(C) In the case of a self-produced material, the sum of-
(1) All expenses incurred in the production of the material, including general expenses; and
(2) An amount for profit equivalent to the profit added in the normal course of trade or equal to the profit that is usually reflected in the sale of goods of the same class or kind as the material.
(ix) Intermediate materials.
(A) In general.-Any self-produced material that is used in the production of a good may be designated by the producer of the good as an intermediate material for purposes of calculating the regional value content of the good under subdivision (c)(ii) or (c)(iii) above.
(B) Materials used in production of intermediate materials.-Subject to the regulations implementing this note, if a self-produced material is designated as an intermediate material under subparagraph (A) for purposes of calculating a regional value content requirement, no other self-produced material subject to a regional value content requirement used or consumed in the production of that intermediate material may be designated by the producer as an intermediate material.
(x) Further adjustments to the value of materials.-The following expenses, if included in the value of a nonoriginating material or material of undetermined origin calculated under subdivision (c)(viii) of this note, may be deducted from the value of the nonoriginating material:
(A) The costs of freight, insurance, packing, and all other costs incurred in transporting the material to the location of the producer.

(iii) Production undertaken on nonoriginating materials used in the production of goods.-In determining whether a good is an originating good under this note, production undertaken on nonoriginating material in the territory of one or more USMCA countries by one or more producers may contribute to the originating status of the good, regardless of whether that production is sufficient to confer originating status to the nonoriginating material.
(e) De minimis amounts of nonoriginating materials.

## Harmonized Tariff Schedule of the United States Revision 9 (2023)

Annotated for Statistical Reporting Purposes

GN p. 38
USMCA
(G) For the purposes of this note, a passenger vehicle or light truck is originating only if the parts listed in column 1 of Table A. 2 of the automotive appendix, as may be further described in applicable regulations, including provisions of the Uniform Regulations, used in the production of a passenger vehicle or light truck are originating. Such a part is originating only if it satisfies the regional value content requirement in subdivision (B), except for an advanced battery.
(H) For the purposes of calculating the regional value content under subdivision (c)(i) of this note, for a part under column 1 of Table A. 2 of the automotive appendix, the value of nonoriginating materials (VNM) is, at the vehicle producer's option:
(1) the value of all non-originating materials used in the production of the part; or
(2) the value of any non-originating components used in the production of the part that are listed under Column 2 of Table A. 2 of such appendix.
(I) Further to subparagraph $(\mathrm{H})$ above, the regional value content may also be calculated, at the producer's option, for all parts under column 1 of Table A. 2 of the automotive appendix as a single part, using the sum of the net cost of each part listed under Column 1 of Table A. 2 of such appendix, and when calculating the VNM, at the producer's option:
(1) the sum of the value of all non-originating materials used in the production of the parts listed under Column 1; or
(2) the sum of the value of only those non-originating components under Column 2 of Table A. 2 of the automotive appendix, used in the production of the parts listed under Column 1 of such table.

If this regional value content meets the required threshold under subparagraph (I)(2), all parts under Table A. 2 of such appendix are originating and the passenger vehicle or light truck will be considered to have met the requirement under subparagraph (H), above.
(J) Notwithstanding any other provision of this note, the regional value content requirement for a heavy truck is:
(1) 60 percent under the net cost method, beginning on July 1, 2020;
(2) 64 percent under the net cost method, beginning on July 1, 2024; or
(3) 70 percent under the net cost method, beginning on July 1, 2027, and thereafter.
(K) Notwithstanding any other provision of this note, the regional value content requirement for a part listed in Table $D$ of the automotive appendix that is for use in a heavy truck is:
(1) 60 percent under the net cost method or 70 percent under the transaction value method, if the corresponding rule in subdivision (o) of this note includes a transaction value method, beginning on July 1, 2020;
(2) 64 percent under the net cost method or 74 percent under the transaction value method, if the corresponding rule in subdivision (0) of this note includes a transaction value method, beginning on July 1, 2024; and

(M) Notwithstanding any other provision of this note, a part of heading 8407 or 8408 or subheading 8708.40 , or a chassis classified in subheading 8708.99, that is for use in a heavy truck, is originating only if it satisfies the applicable regional value content requirement in subdivision (B) above.
(iv) Averaging.-
(A) For the purposes of calculating the regional value content of a passenger vehicle, light truck or heavy truck, the calculation may be averaged over the producer's fiscal year, using any one of the following categories, on the basis of either all motor vehicles in the category or only those motor vehicles in the category that are exported to the territory of one or more of the other USMCA countries:
(1) the same model line of motor vehicles in the same class of vehicles produced in the same plant in the territory of a USMCA country;
(2) the same class of motor vehicles produced in the same plant in the territory of a USMCA country;
(3) the same model line or same class of motor vehicles produced in the territory of a USMCA country; or
(4) any other category as the USMCA countries may decide and provide for in the Uniform Regulations or other appropriate instrument.
(B) For the purposes of calculating the regional value content for an automotive good listed in Tables A.1, B, C, D or E of the automotive appendix, produced in the same plant, or a super-core for a passenger vehicle or light truck, the calculation may be averaged:
(1) over the fiscal year of the motor vehicle producer to whom the good is sold;
(2) over any quarter or month;
(3) over the fiscal year of the producer of the automotive material; or
(4) over any of the categories in subdivision (A)(1) through (A)(4) above,
provided that the good was produced during the fiscal year, quarter, or month forming the basis for the calculation, in which:
(I) the average in subparagraph (A) is calculated separately for those goods sold to one or more motor vehicle producers, or
(II) the average in subparagraph (A) or (B) is calculated separately for those goods that are exported to the territory of another USMCA country.
(v) Steel and aluminum rules.
(A) In addition to the provisions of subdivisions (c) and (o) of this note and other requirements in the automotive appendix, a passenger vehicle, light truck, or heavy truck is originating only if, during a time period provided for in subdivision (v)(B) below, at least 70 percent of:
(1) the vehicle producer's purchases of steel by value in the territories of the USMCA countries; and
(2) the vehicle producer's purchases of aluminum by value in the territories of the USMCA countries,
are of originating goods.
The requirement in this paragraph applies to a vehicle producer's corporate purchases throughout the territories of the USMCA countries, including if the producer has more than one location in a USMCA country where steel and aluminum is purchased. Such purchases of steel and aluminum include direct purchases, purchases through a services center, and purchases contracted through a supplier. Notwithstanding any other provision of this note, beginning on July 1, 2027, for

steel to be considered as originating under this note, all steel manufacturing processes must occur in one or more of the USMCA countries, except for metallurgical processes involving the refinement of steel additives. Such processes include the initial melting and mixing and continues through the coating stage. This requirement does not apply to raw materials used in the steel manufacturing process, including steel scrap; iron ore; pig iron; reduced, processed or pelletized iron ore; or raw alloys.
(B) For the purposes of determining the vehicle producer's purchases of steel or aluminum in paragraph $(v)(A)$ above, the producer may calculate the purchases:
(1) over the previous fiscal year of the producer;
(2) over the previous calendar year;
(3) over the quarter or month to date in which the vehicle is exported;
(4) over the producer's fiscal year to date in which the vehicle is exported; or
(5) over the calendar year to date in which the vehicle is exported.
(C) A steel or aluminum calculation based on the producer's previous fiscal year is valid for the duration of the producer's current fiscal year.

A steel or aluminum calculation based on the previous calendar year is valid for the duration of the current calendar year.
(D) Regulations, including provisions of the Uniform Regulations, may provide additional descriptions for steel and aluminum subject to paragraph $(\mathrm{v})(\mathrm{A})$ above, such as by tariff provisions or product descriptions, to facilitate implementation of this requirement.
(vi) Labor value content.
(A) In addition to the provisions of subdivision (o) and any other applicable provision of this note, and subject to regulations issued by the Secretary of the Treasury, in consultation with the Secretary of Labor, a passenger vehicle is originating only if the vehicle producer certifies that its production meetsa Labor Value Content (LVC) requirement of:
(1) 30 percent, consisting of at least 15 percentage points of high-wage material and manufacturing expenditures, no more than 10 percentage points of high-wage technology expenditures and no more than 5 percentage points of high-wage assembly expenditures, beginning on July 1, 2020;
(2) 33 percent, consisting of at least 18 percentage points of high-wage material and manufacturing expenditures, no more than 10 percentage points of technology expenditures, and no more than 5 percentage points of high-wage assembly expenditures, beginning on July 1, 2021;
(3) 36 percent, consisting of at least 21 percentage points of high-wage material and manufacturing expenditures, no more than 10 percentage points of technology expenditures, and no more than 5 percentage points of high-wage assembly expenditures, beginning on July 1, 2022; or
(4) 40 percent, consisting of at least 25 percentage points of high-wage material and manufacturing expenditures, no more than 10 percentage points of technology expenditures, and no more than 5 percentage points of high-wage assembly expenditures, beginning on July 1, 2023, and thereafter.
(B) In addition to the provisions of subdivision (o) and any other requirement in this note, a light truck or heavy truck is originating only if the vehicle producer certifies that its production meets an LVC requirement of 45 percent, consisting of at least 30 percentage points of high-wage material and manufacturing expenditures, no more than 10 percentage points of high-wage technology expenditures and no more than 5 percentage points of high-wage assembly expenditures.
(C) High-wage material or manufacturing expenditures, high-wage technology expenditures and high-wage assembly expenditures described under paragraphs $(\mathrm{vi})(\mathrm{A})$ and $(\mathrm{v})(\mathrm{B})$ above are calculated as follows:

## Harmonized Tariff Schedule of the United States Revision 9 (2023)

(1) for high-wage material and manufacturing expenditures, the Annual Purchase Value (APV) of purchased parts or materials produced in a plant or facility, and, if the producer elects, any labor costs in the vehicle assembly plant or facility, that is located in North America with a production wage rate that is at least US\$16/hour as a percentage of the net cost of the vehicle, or the total vehicle plant assembly APV, including, if the producer elects, any labor costs in the vehicle assembly plant or facility;
(2) for high-wage technology expenditures, the annual vehicle producer expenditures in North America on wages for research and development (R\&D) or information technology (IT) as a percentage of total annual vehicle producer expenditures on production wages in North America; and
(3) for high-wage assembly expenditures, a single credit of no more than 5 percentage points if the vehicle producer demonstrates that it has an engine assembly, transmission assembly, or an advanced battery assembly plant, or has long term contracts with such a plant, located in North America with an average production wage of at least US\$16 per hour.

The production wage rate is the average hourly base wage rate, not including benefits, of employees directly involved in the production of the part or component used to calculate the LVC, and does not include salaries of management, R\&D, engineering or other workers who are not involved in the direct production of the parts or in the operation of production lines.

High wage material and manufacturing expenses may also be calculated by taking the Annual Purchase Value of purchased parts of materials produced in a plant or facility located in the territories of the USMCA countries with a production wage rate that is at least US $\$ 16 /$ hour as a percentage of total vehicle plant assembly APV, pursuant to applicable provisions of regulations, including provisions of the Uniform Regulations.

R\&D expenditures include expenditures on research and development including prototype development, design, engineering, testing, or certifying operations. IT expenditures include expenditures on software development, technology integration, vehicle communications and information technology support operations.

In the case of a passenger vehicle or light truck, in order to receive the credit described in subparagraph (3), a high wage engine assembly or transmission assembly plant must have a production capacity of at least 100,000 originating engines or transmissions and an advanced battery assembly plant must have a production capacity of at least 25,000 originating assembled advanced battery packs. In the case of a heavy truck, a high-wage engine, transmission or battery assembly plant must have a production capacity of at least 20,000 originating engines, transmissions or assembled advanced battery packs to receive the credit. Engines, transmissions or advanced battery packs need not separately qualify as originating in order to meet this requirement.
(D) Passenger vehicles.--For the purposes of calculating the LVC of a passenger vehicle, light truck or heavy truck, the calculation may be averaged using any one of the following categories, on the basis of either all motor vehicles in the category or only those vehicles in the category that are exported to the territory of one or more of the other USMCA countries:
(1) the same model line of motor vehicles in the same class of vehicles produced in the same plant in the territory of a USMCA country;
(2) the same class of motor vehicles produced in the same plant in the territory of a USMCA country;
(3) the same model line of motor vehicles or same class of motor vehicles produced in the territory of a USMCA country; or
(4) any other category as the USMCA countries may decide.
(E) For the purposes of determining the LVC in paragraphs (A) or (B) above including under any alternative staging regime described in paragraph (viii) that may be implemented, the producer may calculate the LVC over one of the following periods:
(1) the previous fiscal year of the producer;
(2) the previous calendar year;

(3) the quarter or month to date in which the vehicle is produced or exported;
(4) the producer's fiscal year to date in which the vehicle is produced or exported; or
(5) the calendar year to date in which the vehicle is produced or exported.

An LVC calculation based on the producer's previous fiscal year is valid for the duration of the producer's current fiscal year.

An LVC calculation based on the previous calendar year is valid for the duration of the current calendar year.
(F) For the period ending July 1, 2027, if a vehicle producer certifies an LVC for a heavy truck that is higher than 45 percent by increasing the amount of high wage material and manufacturing expenditures above 30 percentage points, the producer may use the points above 30 percentage points as a credit towards the regional value content percentages under this note, provided that the regional value content percentage is not below 60 percent.
(vii) Certification and verification with respect to any provision of this note or of the automotive appendix, including the steel and aluminum requirements described in ( v ) and the labor value content requirements described in (vi), is subject to applicable regulations, including the Uniform Regulations.
(viii) Alternative staging regime.
(A) As may be further provided for in subchapter XXIII of chapter 99 of the tariff schedule, a passenger vehicle or light truck may be originating pursuant to an alternative staging regime, provided that use of the alternative staging regime has been authorized by the Office of the U.S. Trade Representative, during the period that such regime is in effect. An alternative staging regime for eligible passenger vehicles or light trucks must meet the requirements of applicable regulations, including provisions of the Uniform Regulations, and is subject to the terms of the plan as authorized by the Office of the U.S. Trade Representative.
(B) For purposes of this subparagraph, a vehicle is not eligible for preferential tariff treatment under an alternative staging regime if the Office of the United States Trade Representative (USTR)—
(1) has determined that the producer of that vehicle will not be able to meet applicable requirements after the alternative staging regime has expired; or
(2) has determined that the producer of that vehicle has failed to take the steps set forth in its request for an alternative staging regime and will not be able to meet applicable requirements after the alternative staging regime has expired as a result of such failure, has provided false or misleading information in its request, or has failed to notify the USTR of material changes in circumstances that will prevent it from meeting applicable requirements after the alternative staging regime has expired.

(v) A rule applicable to a tariff item shall take precedence over a rule applicable to the heading or subheading which is parent to that tariff item.
(vi) A reference to weight in the rules in subdivision (o) of this note for goods provided for in chapters 1 through 24 of the tariff schedule means dry weight unless otherwise specified in the tariff schedule.
(vii) A requirement of a change in tariff classification in subdivision (o) of this note applies only to nonoriginating materials.
(n) Interpretation of rules of origin.--For purposes of this note-
(i) Except for a good provided for in any of chapters 61 to 63 of the tariff schedule, a good is an originating good if-
(A) it is produced entirely in the territory of one or more USMCA countries;
(B) one or more of the nonoriginating materials provided for as "parts" in the tariff schedule and used in the production of the good cannot satisfy the requirements set out in subdivision (o) of this note, because-
(1) both the good and its materials are classified in the same subheading or in the same heading that is not further subdivided into subheadings, or
(2) the good was imported into the territory of a USMCA country in an unassembled or a disassembled form but was classified as an assembled good pursuant to general interpretive rule 2(a) of the tariff schedule; and
(C) the regional value content of the good, determined in accordance with subdivision (c) of this note, is not less than 60 percent if the transaction value method is used, or not less than 50 percent if the net cost method is used.
(ii) Non-qualifying operations. Each USMCA country shall provide that a good shall not be considered to be an originating good merely by reason of--
(A) mere dilution with water or another substance that does not materially alter the characteristics of the good; or
(B) a production or pricing practice in respect of which it may be demonstrated, on the basis of a preponderance of evidence, that the object was to circumvent this note and applicable regulations.
(iii) For the purposes of applying this note to goods of chapters 6 through 14, inclusive, agricultural and horticulturalgoods grown in the territory of a USMCA country shall be treated as originating in territory of that USMCA country even if grown from seed, bulbs, rootstock, cuttings, slips or other live parts of plants imported from a non-USMCA country.
(iv) A good of any heading in chapters 28 through 38, inclusive, that satisfies one or more of the provisions enumerated in this subdivision shall be treated as an originating good, except as otherwise specified in those rules. Notwithstanding the preceding sentence, a good is an originating good if it meets the applicable change in tariff classification or satisfies the applicable value content requirement specified in subdivision (o) of this note.
(A) A good of chapters 28 through 38, except a good of headings 3301 or 3823 or subheadings 2916.32 or 3502.11 through 3502.19, that results from a chemical reaction in the territory of one or more USMCA countries shall be treated as an originating good.
(B) For the purposes of this note, a "chemical reaction" is a process (including a biochemical process) that results in a molecule with a new structure by breaking intramolecular bonds and by forming new intramolecular bonds, or by altering the spatial arrangement of atoms in a molecule. The following are not considered to be chemical reactions for the purposes of determining whether a good is an originating good:
(1) dissolution in water or in another solvent;
(2) the elimination of solvents, including solvent water; or
(3) the addition or elimination of water of crystallisation.
(C) A good of chapters 28 through 38, except for a good of heading 3301 or subheadings 3502.11 through 3502.19, that is subject to purification is an originating good, provided that the purification occurs in the territory of one or more of the USMCA countries and results in the following:
(1) the elimination of not less than 80 percent of the content of existing impurities; or
(2) the reduction or elimination of impurities resulting in a good suitable for one or more of the following:
(I) as a pharmaceutical, medical, cosmetic, veterinary, or food grade substance,
(II) as a chemical product or reagent for analytical, diagnostic, or laboratory uses,
(III) as an element or component for use in micro-elements,
(IV) for specialized optical uses,
(V) for non-toxic uses for health and safety;
(VI) for biotechnical use (e.g. in cell culturing, in genetic technology, or as a catalyst),
(VII) as a carrier used in a separation process, or
(VIII) or nuclear grade uses.
(D) A good of chapters 28 through 38, except for a good of chapters 28, 29, or 32, headings 3301 or 3808, or subheadings 3502.11 through 3502.19 is an originating good if the deliberate and proportionally controlled mixing or blending (including dispersing) of materials other than the addition of diluents, to conform to predetermined specifications occurs in the territory of one or more of the USMCA countries, resulting in the production of a good having essential physical or chemical characteristics that are relevant to the purposes or uses of the good and are different from the input materials.

# Harmonized Tariff Schedule of the United States Revision 9 (2023) 

(E) A good of chapters 28 through 38, except for a good of chapters 28, 29, 32 or 38, heading 3301 or subheadings 3502.11 through 3502.19, is an originating good if the deliberate and controlled modification in particle size of a good, including micronizing by dissolving a polymer and subsequent precipitation, other than by merely crushing or pressing, occurs in the territory of one or more of the USMCA countries, resulting in a good with a defined particle size, defined particle size distribution or defined surface area, that is relevant to the purposes of the resulting good, and having essential physical or chemical characteristics different from the input materials.
(F) A good of chapters 28 through 38, except for a good of heading 3301 or subheadings 3502.11 through 3502.19 , is an originating good if the standards material is produced in the territory of one or more of the USMCA countries. For the purposes of this rule, a "standards material" (including a standard solution) is a preparation suitable for analytical, calibrating or referencing uses, having precise degrees of purity or proportions that are certified by the manufacturer.
(G) A good of chapters 28 through 38, except for a good of heading 3301 or subheadings 3502.11 through 3502.19 , is an originating good if the isolation or separation of isomers from mixtures of isomers occurs in the territory of one or more of the USMCA countries.
(H) A good of chapters 28 through 38, except for a good of heading 3301 or subheadings 3502.11 through 3502.19, that undergoes a change from one classification to another in the territory of one or more of the USMCA countries as a result of the separation of one or more materials from a man-made mixture, shall not be treated as an originating good unless the isolated material underwent a chemical reaction in the territory of one or more of the USMCA countries.
(I) A good of chapters 28 through 38, except for a good of headings 2930 through 2942, chapter 30, heading 3301 or subheadings 3502.11 through 3502.19 , is an originating good if it undergoes a biochemical process or one or more of the following processes:
(1) Biological or biotechnological culturing, hybridization or genetic modification of:
(I) Micro-organisms (bacteria, viruses (includes phages) etc.), or
(II) Human, animal or plant cells;
(2) Production, isolation, or purification of cellular or intercellular structures (such as isolated genes, gene fragments, and plasmids); or
(3) Products obtained by fermentation.
(v) A good of any heading in chapters 39 through 40 that satisfies one or more of the provisions enumerated in this subdivision shall be treated as an originating good, except as otherwise specified in those rules. Notwithstanding the preceding sentence, a good is an originating good if it meets the applicable change in tariff classification or satisfies the applicable value content requirement specified insubdivision (0) of this note.
(A) A good of chapters 39 through 40 that results from a chemical reaction in the territory of one or more of the USMCA countries shall be treated as an originating good.
(B) For the purposes of this rule, a "chemical reaction" is a process (including a biochemical process) that results in a molecule with a new structure by breaking intramolecular bonds and by forming new intramolecular bonds, or by altering the spatial arrangement of atoms n a molecule. The following are not considered to be chemical reactions for the purposes of determining whether a good is anoriginating good under this note:
(1) dissolution in water or in another solvent;
(2) the elimination of solvents, including solvent water; or
(3) the addition or elimination of water of crystallization.
(C) A good of chapters 39 through 40 that is subject to purification is an originating good, provided that the purification occurs in the territory of one or more of the USMCA countries and results in the following:

## Chapter 27

Chapter rule 1: Notwithstanding the applicable product-specific rules of origin, a good of chapter 27 that is the product of a chemical reaction is an originating good if the chemical reaction occurred in the territory of one or more of the USMCA countries.

For the purposes of this rule, a "chemical reaction" is a process (including a biochemical process) that results in a molecule with a new structure by breaking intramolecular bonds and by forming new intramolecular bonds, or by altering the spatial arrangement of atoms in a molecule. The following are not considered to be chemical reactions for the purposes of this definition:
(a) dissolving in water or other solvents;
(b) the elimination of solvents, including solvent water; or
(c) the addition or elimination of water of crystallisation.

Heading rule: For the purposes of heading 2710, the following processes confer origin:
(a) Atmospheric distillation-a separation process in which petroleum oils are converted, in a distillation tower, into fractions according to boiling point and the vapor then condensed into different liquefied fractions. Liquefied petroleum gas, naphtha, gasoline, kerosene, diesel/heating oil, light gas oils, and lubricating oil are produced from petroleum distillation;

## Harmonized Tariff Schedule of the United States Revision 9 (2023)

(b) Vacuum distillation-distillation at a pressure below atmospheric but not so low that it would be classed as molecular distillation. Vacuum distillation is useful for distilling high-boiling and heat-sensitive materials such as heavy distillates in petroleum oils to produce light to heavy vacuum gas oils and residuum. In some refineries gas oils may be further processed into lubricating oils;
(c) Catalytic hydroprocessing-the cracking or treating of petroleum oils with hydrogen at high temperature and under pressure, in the presence of special catalysts. Catalytic hydroprocessing includes hydrocracking and hydrotreating;
(d) Reforming (catalytic reforming)-the rearrangement of molecules in a naphtha boiling range material to form higher octane aromatics (i.e., improved antiknock quality at the expense of gasoline yield). A main product is catalytic reformate, a blend component for gasoline. Hydrogen is another by-product;
(e) Alkylation-a process whereby a high-octane blending component for gasolines is derived from catalytic combination of an isoparaffin and an olefin;
(f) Cracking-a refining process involving decomposition and molecular recombination of organic compounds, especially hydrocarbons obtained by means of heat, to form molecules suitable for motor fuels, monomers, petrochemicals, etc.;
(i) Thermal cracking-exposes the distillate to temperatures of approximately 540-650 degrees C (1000-1200 degrees F) for varying periods of time. Process produces modest yields of gasoline and higher yields of residual products for fuel oil blending, or
(ii) Catalytic cracking-hydrocarbon vapors are passed at approximately 400 degrees C ( 750 degrees $F$ ) over a metallic catalyst (e.g., silica-alumina or platinum); the complex recombinations (alkylation, polymerization, isomerization, etc.) occur within seconds to yield high-octane gasoline. Process yields less residual oils and lightgases than thermal cracking;
(g) Coking-a thermal cracking process for the conversion of heavy low grade products, such as reduced crude, straight run pitch, cracked tars, and shale oil into solid coke (carbon) and lower boiling hydrocarbon products which are suitable as feed for other refinery units for conversion into lighter products; and
(h) Isomerization-the refinery process of converting petroleum compounds into their isomers.

Heading rule: For the purposes of heading 2710, "direct blending" is a refinery process whereby various petroleum streams from processing units and petroleum components from holding/storage tanks combine to create a finished product, with pre-determined parameters, classified under heading 2710 , provided that the nonoriginating material constitutes no more than 25 percent by volume of the good.

Heading rule: For the purposes of determining whether or not a good of heading 2709 is an originating good, the origin of diluent of headings 2709 or 2710 that is used to facilitate the transportation between USMCA countries of crude petroleum oils and crude oils obtained from bituminous minerals of heading 2709 is disregarded, provided that the diluent constitutes no more than 40 percent by volume of the good.

Whenever an eligible article which is a good of one or more designated beneficiary CBTPA countries enumerated in subdivision (a) of this note is imported directly into the customs territory of the United States, such article shall be entitled to receive the duty-free or reduced duty treatment provided for herein, provided that such good--
(i) was wholly obtained or produced entirely in the territory of one or more designated beneficiary countries enumerated in subdivision (a) of this note, or

(i) such goods are imported directly from Jordan into the customs territory of the United States, and
(ii) they are-
(A) wholly the growth, product or manufacture of Jordan, or

If the pertinent information is not available, the appraising officer may ascertain or estimate the value thereof using all reasonable ways and means at his disposal.

(vi) For purposes of subdivision (b)(i) of this note, except for goods covered by the provisions of subdivision (d) of this note, the term " imported directly" means-
(A) direct shipment from Jordan to the United States without passing through the territory of any intermediate country, or
(B) if shipment is through the territory of an intermediate country, the articles in the shipment do not enter into the commerce of any intermediate country and the invoices, bills of lading and other shipping documents show the United States as the final destination, or
(C) if shipment is through an intermediate country and the invoices and other documents do not show the United States as the final destination, then the articles in the shipment are imported directly only if they-

(vii) If the origin of a textile or apparel article cannot be determined under subdivision (d)(i) or (d)(iii) through (d)(vi), inclusive, of this note, then that article shall be considered to meet the requirements of subdivision (b) of this note if-
(A) the most important assembly or manufacturing process occurs in Jordan, or
(B) if the applicability of subdivision (b) of this note cannot be determined under subdivision (d)(vii)(A) of this note, the last important assembly or manufacturing occurs in Jordan.
(e) Exclusion. A good shall not be considered to meet the requirements of subdivision (b) of this note if the good-
(i) is imported into Jordan, and, at the time of importation, would be classified in heading 0805 of the tariff schedule, and
(ii) is processed in Jordan into a good classified in subheadings 2009.11 through 2009.39, inclusive, of the tariff schedule.
(f) Certification and records. Whenever an importer enters an article as eligible for the preferential treatment provided under this note-
(i) the importer shall be deemed to certify that such article qualifies for the preferential treatment provided under this note;
(li) the importer shall be prepared to submit to the customs officer concerned, upon request, a declaration setting forth all pertinent information concerning the production or manufacture of the article, and the information on such declaration should contain at least the following pertinent details:

(E) a description of the origin and cost or value of any foreign materials used in the article which have not been substantially transformed in Jordan.

This declaration shall be prepared, signed and submitted upon request by the U.S. customs officer concerned. A declaration should only be requested when the Customs Service has reason to question the accuracy of the certification that, by operation of subdivision (f)(i) of this note, is deemed to have occurred, or when the Customs Service procedures for assessing the risk of improper or incorrect entry of an article indicate that verification of an entry is appropriate, or when a random verification is conducted. The information necessary for the preparation of the declaration shall be retained in the files of the importer for a period of five years.
(g) The Secretary of the Treasury, after consultation with the United States Trade Representative, shall prescribe such regulations as may be necessary to carry out this note.

(B) if no change in tariff classification is required, the good otherwise satisfies the applicable requirements set forth in such subdivision (o).

An importer may make a claim for preferential treatment under this note based on the importer's knowledge or on information in the importer's possession that the good qualifies as an originating good. For the purposes of this note, the term "SFTA country" refers only to Singapore or to the United States.
(c) (i) For purposes of subdivision (b)(i) of this note, except as otherwise provided in subdivision (d) of this note for textile and apparel articles, the expression "wholly obtained or produced" refers to goods that are-

(1) the complete disassembly of used goods into individual parts; and
(2) the cleaning, inspecting, testing or other processing of those parts as necessary for improvement to sound working condition by one or more of the following processes: welding, flame spraying, surface machining, knurling, plating, sleeving and rewinding; the foregoing in order for such parts to be assembled with other parts, including other recovered parts, in the production of a remanufactured good as defined in subdivision (ii)(B).

(C) For the purposes of this note-
(1) the term "material" means a good that is used in the production of another good;
(2) the term "material that is self-produced" means a good, such as a part or ingredient, that is produced by a producer and used by such producer in the production of another good;
(3) the term "used" as it appears in this subdivision means used or consumed in the production of goods; and
(4) a "nonoriginating material" is a material that has not satisfied the requirements of this note.
(D) For the purposes of this note, the term "production" means growing, raising, mining, harvesting, fishing, trapping, hunting, manufacturing, processing, assembling or disassembling a good; and the term "producer" means a person who grows, raises, mines, harvests, fishes, traps, hunts, manufactures, processes, assembles or disassembles a good.
(iii) A good shall not be considered to be an originating good if, after it has undergone production that satisfies the requirements of this note, the good undergoes subsequent production or any other operation outside the territory of Singapore and of the United States, other than unloading, reloading or any other operation necessary to preserve it in good condition or to transport the good to the territory of Singapore or of the United States.
(d) Textile and apparel articles.
(i) Except as provided in subdivision (ii) below, a textile or apparel good provided for in chapters 50 through 63 of the tariff schedule that is not an originating good under the terms of this note because certain fibers or yarns used in the production of the component of the good that determines the tariff classification of the good do not undergo an applicable change in tariff classification set out in subdivision (o) of this note, shall nonetheless be considered to be an originating good if the total weight of all such fibers or yarns in that component is not more than seven percent of the total weight of that component. Notwithstanding the preceding sentence, a textile or apparel good containing elastomeric yarns in the component of the good that determines the tariff classification of the good shall be considered an originating good only if such yarns are wholly formed in the territory of Singapore or of the United States.
(ii) Notwithstanding any other provision of this note, an apparel good of chapter 61 or 62 of the tariff schedule shall be considered to be an originating good if it is both cut (or knit to shape) and sewn or otherwise assembled in the territory of Singapore or of the United States, or both, from fabric or yarn, regardless of the origin of such fabric or yarn, designated by the appropriate United States government authority as fabric or yarn not available in commercial quantities in a timely manner in the United States. Such designation must have been made in a notice published in the Federal Register on or before November 15, 2002, identifying apparel goods made from such fabric or yarn as eligible for entry into the United States under subheading 9819.11.24 or 9820.11 .27 of chapter 98 of the tariff schedule. For purposes of this subdivision, reference in such a notice to yarn or fabric formed in the United States is deemed to include yarn or fabric formed in Singapore.
(e) De minimis.
(i) A good, other than a textile or apparel good described in subdivision (d) of this note, that does not undergo a change in tariff classification pursuant to subdivision (0) of this note shall nonetheless be considered to be an originating good if-
(A) the value of all nonoriginating materials used in the production of the good that do not undergo the required change in tariff classification does not exceed 10 percent of the adjusted value of the good;
(B) if the good is subject to a regional value-content requirement under the terms of subdivision (g) or (o) of this note, the value of such nonoriginating materials is taken into account in calculating the regional value content of the good; and
(C) the good meets all other applicable criteria set forth in this note for qualifying as an originating good.
(ii) Subdivision (e)(i) does not apply to-
(A) a nonoriginating material provided for in chapter 4 or in subheading 1901.90 that is used in the production of a good provided for in chapter 4;
(B) a nonoriginating material provided for in chapter 4 or in subheading 1901.90 that is used in the production of a good provided for in the following provisions: subheadings 1901.10, 1901.20 or 1901.90; heading 2105 ; or subheadings 2106.90, 2202.90 or 2309.90;
(C) a nonoriginating material provided for in heading 0805 or subheadings 2009.11 through 2009.39 that is used in the production of a good provided for in subheadings 2009.11 through 2009.39 or in subheading 2106.90 or 2202.90;
(D) a nonoriginating material provided for in chapter 15 that is used in the production of a good provided for in headings 1501 through $1508,1512,1514$ or 1515 ;
(E) a nonoriginating material provided for in heading 1701 that is used in the production of a good provided for in headings 1701 through 1703;

(G) a nonoriginating material provided for in headings 2203 through 2208 that is used in the production of a good provided for in headings 2207 or 2208; and
(H) a nonoriginating material used in the production of a good provided for in chapters 1 through 21, inclusive, unless the nonoriginating material is provided for in a different subheading than the good for which origin is being determined under this note.
(iii) For the purposes of this note, the term "adjusted value" means the value determined under articles 1 through 8, article 15 and the corresponding interpretative notes of the Agreement on Implementation of Article VII of the General Agreement on Tariffs and Trade (the Customs Valuation Agreement), except that such value may be adjusted to exclude any costs, charges or expenses incurred for transportation, insurance and related services incident to the international shipment of the merchandise from the country of exportation to the place of importation.

## (f) Accumulation.

## Singapore

(i) For purposes of this note, originating materials from the territory of either Singapore or the United States that are used in the production of a good in the territory of the other country shall be considered to originate in the territory of such other country.
(ii) A good is an originating good when it is produced in the territory of Singapore or of the United States, or both, by one or more producers, provided that the good satisfies all of the applicable requirements of this note.
(g) Regional value content.
(i) Where a rule set forth in subdivision (o) of this note specifies a regional value content for a good, the regional value content of such good shall be calculated, at the choice of the person claiming the tariff treatment authorized by this note for such good, on the basis of one of the following methods, unless otherwise specified herein:
(A) For the build-down method, the regional value content may be calculated on the basis of the formula RVC = ((AV VNM)/AV) $\times 100$, where RVC is the regional value content, expressed as a percentage; AV is the adjusted value; and VNM is the value of non-originating materials that are acquired and used by the producer in the production of the good; or
(B) For the build-up method, the regional value content may be calculated on the basis of the formulaRVC $=(\underline{\text { VOM }} / \mathrm{AV}) \mathrm{x}$ 100 , where RVC is the regional value content, expressed as a percentage; AV is the adjusted value; and VOM is the value of originating materials that are acquired or self-produced and are used by the producer in the production of the good.
(ii) Value of materials.
(A) For purposes of calculating the regional value content of a good under subdivision (i) and for purposes of applying the de minimis provisions of subdivision (e) of this note, the value of a material is:
(1) in the case of a material imported by the producer of the good, the adjusted value of the material;
(2) in the case of a material acquired in the territory where the good is produced, except for a material to which subdivision (3) below applies, the adjusted value of the material; or
(3) in the case of a material that is self-produced, or in a case in which the relationship between the producer of the good and the seller of the material influenced the price actually paid or payable for the material, including a material obtained without charge, the sum of-
(I) all expenses incurred in the production of the material, including general expenses; and
(II) an amount for profit.
(B) The value of materials may be adjusted as follows:
(1) for originating materials, the following expenses, if not included under subdivision (A) above, may be added to the value of the originating material:
(I) the costs of freight, insurance, packing and all other costs incurred in transporting the material to the location of the producer;
(II) duties, taxes and customs brokerage fees on the material paid in the territory of Singapore or of the United States, or both, other than duties and taxes that are waived, refunded, refundable or otherwise recoverable, including credit against duty or tax paid or payable; and
(III) the cost of waste and spoilage resulting from the use of the material in the production of the good, less the value of renewable scrap or by-product; and
(2) for non-originating materials, if included under subdivision (A) above, the following expenses may be deducted from the value of the nonoriginating material:
(I) the costs of freight, insurance, packing and all other costs incurred in transporting the material to the location of the producer;
(II) duties, taxes and customs brokerage fees on the material paid in the territory of Singapore or of the United States, or both, other than duties and taxes that are waived, refunded, refundable or otherwise recoverable, including credit against duty or tax paid or payable;
(III) the cost of waste and spoilage resulting from the use of the material in the production of the good, less the value of renewable scrap or by-products;
(IV) the cost of processing incurred in the territory of Singapore or of the United States in the production of the non-originating material; and
(V) the cost of originating materials used in the production of the nonoriginating material in the territory of Singapore or of the United States.
(h) Accessories, spare parts and tools.

Accessories, spare parts or tools that are delivered with a good and that form part of the good's standard accessories, spare parts or tools shall be treated as originating goods for purposes of this note if the good is an originating good, and shall be disregarded in determining whether all the nonoriginating materials used in the production of the good undergo an applicable change in tariff classification specified in subdivision (o) of this note, provided that:
(i) the accessories, spare parts or tools are not invoiced separately from the good;
(ii) the quantities and value of the accessories, spare parts or tools are customary for the good; and
(iii) if the good is subject to a regional value-content requirement, the value of the accessories, spare parts or tools shall be taken into account as originating or non-originating materials, as the case may be, in calculating the regional value content of the good under subdivision (g) of this note.
(i) Fungible goods and materials.
(i) A person claiming the treatment provided in this note for a good may claim that a fungible good or material is originating either based on the physical segregation of each fungible good or material or by using an inventory management method. For purposes of this subdivision, the term "inventory management method" means:
(A) averaging,
(B) "last-in, first-out,"
(C) "first-in, first out," or
(D) any other method that is recognized in the generally accepted accounting principles of the country in which the production is performed (whether Singapore or the United States) or otherwise accepted by that country.

The term "fungible goods" or fungible materials" means goods or materials, as the case may be, that are interchangeable for commercial purposes and the properties of which are essentially identical.
(ii) A person selecting an inventory management method under subdivision (i) above for particular fungible goods or materials shall continue to use that method for those fungible goods or materials throughout the fiscal year of that person.
(j) Packaging materials and containers.

## Harmonized Tariff Schedule of the United States Revision 9 (2023)

(i) Packaging materials and containers in which a good is packaged for retail sale, if classified with the good for which the tariff treatment under the terms of this note is claimed, shall be disregarded in determining whether all the nonoriginating materials used in the production of the good undergo the applicable change in tariff classification set out in subdivision (o) of this note and, if the good is subject to a regional value-content requirement, the value of such packaging materials and containers shall be taken into account as originating or non-originating materials, as the case may be, in calculating the regional value content of the good.
(ii) Packing materials and containers in which a good is packed for shipment shall be disregarded in determining whether-
(A) the nonoriginating materials used in the production of the good undergo an applicable change in tariff classification set out in subdivision (o) of this note; and
(B) the good satisfies a regional value-content requirement.
(k) Indirect materials.

An indirect material shall be considered to be an originating material for purposes of this note without regard to where it is produced, and its value shall be the cost registered in the accounting records of the producer of the good. The term "indirect material" means a good used in the production, testing or inspection of a good but not physically incorporated into the good, or a good used in the maintenance of buildings or the operation of equipment associated with the production of a good, including-
(i) fuel and energy;
(ii) tools, dies and molds;
(iii) spare parts and materials used in the maintenance of equipment or buildings;
(iv) lubricants, greases, compounding materials and other materials used in production or used to operate equipment and buildings;
(v) gloves, glasses, footwear, clothing, safety equipment and supplies;
(vi) equipment, devices and supplies used for testing or inspecting the goods;
(vii) catalysts and solvents; and
(viii) any other goods that are not incorporated into the good but the use of which in the production of the good can reasonably be demonstrated to be a part of that production.
(I) Record-keeping requirements and verification.
(i) An importer of a good, for which treatment as an originating good of a SFTA country is claimed under the provisions of this note, shall be prepared to submit, upon request by the appropriate customs officer, a statement setting forth the reasons that the good qualifies as an originating good under the provisions of this note, including pertinent cost and manufacturing information, as provided in pertinent regulations.
(ii) Importers shall maintain for a period of five years after the date of importation their records relating to the importation of the good and shall, upon request by the appropriate customs officer, make available records which are necessary to demonstrate that a good qualifies as an originating good under the provisions of this note, including records concerning:
(A) the purchase of, cost of, value of and payment for the good;
(B) the purchase of, cost of, value of and payment for all materials, including indirect materials, used in the production of the good; and
(C) the production of the good in the form in which the good is exported.
(iii) For purposes of determining whether a good imported into the customs territory of the United States from the territory of Singapore qualifies as an originating good under the provisions of this note, the appropriate customs officer may conduct a verification by means of-
(A) requests for information from the importer;
(B) written requests for information to an exporter or a producer in the territory of Singapore or of the United States;
(C) requests for the importer to arrange for the producer or exporter to provide information directly to the country conducting the verification;
(D) information received directly by the appropriate customs officer from an exporter or a producer as a result of a process described in subdivision (i) above;
(E) visits to the premises of an exporter or a producer in the territory of Singapore or of the United States, in accordance with any procedures that these countries jointly adopt pertaining to the verification, as set forth in pertinent regulations; or
(F) such other procedures as the United States and Singapore may agree, as set forth in pertinent regulations.
(m) Goods that shall be considered originating goods. For the purposes of subdivision (b)(ii) of this note, goods that, in their condition as imported, are classifiable in the tariff provisions enumerated in the first column and are described opposite such provisions, when such goods are imported into the customs territory of the United States from the territory of Singapore, shall be considered originating goods for the purposes of this note:

(n) Interpretation of rules of origin.
(i) Unless otherwise specified, and except for goods whose origin is determined under subdivision ( m ) of this note, a rule in subdivision (o) of this note that is set out adjacent and is applicable to an 8 -digit tariff item shall take precedence over a rule applicable to a 6 -digit subheading superior thereto and covering the goods of such tariff item, and a rule set out adjacent and applicable to a subheading shall take precedence over a rule applicable to a 4 -digit heading superior thereto and covering the goods of such subheading. For purposes of this subdivision and subdivision (o) of this note, a tariff provision is a "heading" if its article description is not indented; a provision is a "subheading" if no subordinate 8 -digit rate lines appear below it.
(ii) References to weight in the rules set forth in subdivision (o) of this note for goods provided for in chapters 1 through 24 of the tariff schedule mean dry weight, unless otherwise specified in the tariff schedule.
(iii) Except as provided herein, a requirement of a change in tariff classification in subdivision (o) of this note applies only to nonoriginating materials except as follows:
(A) agricultural and horticultural goods grown in the territory of a SFTA country shall be treated as originating in the territory of that country even if they are grown from seed, bulbs, rootstock, cuttings, slips or other live parts of plants imported from a country other than a SFTA country; and
(B) goods of the provisions listed below which are exported from the territory of a SFTA country shall be treated as nonoriginating:
(I) heading 1202, if the goods were not harvested in the territory of a SFTA country;
(II) subheading 2008.11, if any material provided for in heading 1202 used in the production of such goods was not harvested in the territory of a SFTA country; or
(III) subheading 1806.10, if such goods contain 90 percent or more by dry weight of sugar and sugar syrups of subheading 2106.90, if any material provided for in subheading 1701.99 used in the production of such goods is not an originating good.
(iv) A good of chapters 1 through 40, inclusive, shall not be considered to be originating solely by reason of mere dilution with water or another substance that does not materially alter the characteristics of the good.
(v) For purposes of applying this note to goods of chapters 27 through 40, inclusive, of the tariff schedule, a "chemical reaction" is a process (including a biochemical process) which results in a molecule with a new structure by breaking intramolecular bonds and by forming new intramolecular bonds, or by altering the spatial arrangement of atoms in a molecule. The following are not considered to be chemical reactions for purposes of this note:
(A) dissolving in water or other solvents;
(B) the eliminating of solvents including solvent water; or
(C) the addition or elimination of water of crystallization.

A chemical reaction as defined above is considered to result in an originating good for purposes of this note. Notwithstanding any of the change of tariff classification rules of subdivision (o) of this note, this "chemical reaction rule" may be applied to any good classified in chapters 28 through 40, inclusive.
(0) Change in tariff classification rules. [NOTE: Not updated for Pres.Proc. 8771, effective Feb. 3, 2012.]

(J) recovered goods derived in the territory of Chile or of the United States, or both, from used goods; or
(K) goods produced in the territory of Chile or of the United States, or both, exclusively from goods referred to in subdivisions (A) through (I) above, inclusive, or from the derivatives of such goods, at any stage of production.
(ii) (A) For the purposes of subdivision (i)(J), the term "recovered goods" means materials in the form of individual parts that are the result of:
(1) the complete disassembly of used goods into individual parts; and
(2) the cleaning, inspecting, testing or other processing of those parts as necessary for improvement to sound working condition by one or more of the following processes: welding, flame spraying, surface machining, knurling, plating, sleeving, and rewinding; the foregoing in order for such parts to be assembled with other parts, including other recovered parts, in the production of a remanufactured good as defined in subdivision (ii)(B).
(B) The term "remanufactured good" for purposes of this note means an industrial good assembled in the territory of Chile or of the United State that is classified in the provisions of the tariff schedule enumerated below (except for those designed principally for use in automotive goods of headings $8702,8703,8706$ and 8707 or subheadings $8704.21,8704.31$ and 8704.32):

when such industrial good-
(1) is entirely or partially comprised of recovered goods;
(2) has the same life expectancy and meets the same performance standards as a new good; and
(3) enjoys the same factory warranty as such a new good.
(C) For the purposes of this note-
(1) the term "material" means a good that is used in the production of another good, including a part, ingredient or indirect material;
(2) the term "material that is self-produced" means a material that is an originating good produced by a producer of a good and used in the production of that good; and

## Harmonized Tariff Schedule of the United States Revision 9 (2023)

(3) a "nonoriginating good or material" is a good or material, as the case may be, that does not qualify as an originating good under this note.
(D) For the purposes of this note, the term "production" means growing, raising, mining, harvesting, fishing, trapping, hunting, manufacturing, processing, assembling or disassembling a good; and the term "producer" means a person who engages in the production of a good in the territory of Chile or of the United States.
(iii) A good that has undergone production necessary to qualify as an originating good under this note shall not be considered to be an originating good if, subsequent to that production, the good undergoes further production or any other operation outside the territory of Chile or of the United States, other than unloading, reloading or any other process necessary to preserve the good in good condition or to transport the good to the territory of Chile or of the United States.

## (d) Textile and apparel articles.

(i) Except as provided in subdivision (ii) below, a good provided for in chapters 50 through 63 of the tariff schedule that is not an originating good under the terms of this note, because certain fibers or yarns used in the production of the component of the good that determines the tariff classification of the good do not undergo an applicable change in tariff classification set out in subdivision ( n ) of this note, shall nonetheless be considered to be an originating good if the total weight of all such fibers or yarns in that component is not more than seven percent of the total weight of that component. Notwithstanding the preceding sentence, a textile or apparel good containing elastomeric yarns in the component of the good that determines the tariff classification of the good shall be considered to be an originating good only if such yarns are wholly formed in the territory of Chile or of the United States.
(ii) Notwithstanding the rules set forth in subdivision (n) of this note, textile and apparel goods classifiable as goods put up in sets for retail sale as provided under general rule of interpretation 3 to the tariff schedule shall not be considered to be originating goods unless each of the goods in the set is an originating good or the total value of the nonoriginating goods in the set does not exceed 10 percent of the value of the set determined for purposes of assessing customs duties.
(e) De minimis.
(i) Except as provided in subdivision (ii) below, a good (other than a textile or apparel good described in subdivision (d) above) that does not undergo a change in tariff classification pursuant to subdivision ( n ) of this note shall nonetheless be considered to be an originating good if-
(A) the value of all nonoriginating materials that are used in the production of the good and do not undergo the applicable change in tariff classification does not exceed 10 percent of the adjusted value of the good;
(B) the value of such nonoriginating materials is included in calculating the value of nonoriginating materials for any applicable regional value-content requirement under this note; and
(C) the good meets all other applicable requirements of this note.
(ii) Subdivision (e)(i) does not apply to-
(A) a nonoriginating material provided for in chapter 4, or a nonoriginating dairy preparation containing over 10 percent by weight of milk solids provided for in subheading 1901.90 or 2106.90 that is used in the production of a good provided for in chapter 4;
(B) a nonoriginating material provided for in chapter 4, or a nonoriginating dairy preparation containing over 10 percent by weight of milk solids provided for in subheading 1901.90 that is used in the production of the following goods:
(1) infant preparations containing over 10 percent by weight of milk solids, the foregoing provided for in subheading 1901.10;
(2) mixes and doughs, containing over 25 percent by weight of butterfat, not put up for retail sale, the foregoing provided for in subheading 1901.20;

(4) goods provided for in heading 2105;
(5) beverages containing milk, the foregoing provided for in subheading 2202.90; or
(6) animal feeds containing over 10 percent by weight of milk solids, the foregoing provided for in subheading 2309.90;
(C) a nonoriginating material provided for in heading 0805 or subheadings 2009.11 through 2009.39 that is used in the production of a good provided for in subheadings 2009.11 through 2009.39, or in fruit or vegetable juice of any single fruit or vegetable, fortified with minerals or vitamins, concentrated or unconcentrated, provided for in subheading 2106.90 or 2202.90;
(D) a nonoriginating material provided for in chapter 15 that is used in the production of a good provided for in headings 1501 through 1508, 1512, 1514 or 1515;
(E) a nonoriginating material provided for in heading 1701 that is used in the production of a good provided for in headings 1701 through 1703;
(F) a nonoriginating material provided for in chapter 17 or heading 1805 that is used in the production of a good provided for in subheading 1806.10;
(G) a nonoriginating material provided for in headings 2203 through 2208 that is used in the production of a good provided for in headings 2207 or 2208; and
(H) a nonoriginating material used in the production of a good provided for in chapters 1 through 21, inclusive, unless the nonoriginating material is provided for in a different subheading than the good for which origin is being determined under this note.
(iii) For the purposes of this note, the term "adjusted value" means the value determined under articles 1 through 8, article 15 and the corresponding interpretive notes of the Agreement on Implementation of Article VII of the General Agreement on Tariffs and Trade (the Customs Valuation Agreement), except that such value may be adjusted to exclude any costs, charges or expenses incurred for transportation, insurance and related services incident to the international shipment of the merchandise from the country of exportation to the place of importation.
(f) Accumulation.
(i) For purposes of this note, originating goods or materials from the territory of either Chile or the United States that are used in the production of a good in the territory of the other country shall be considered to originate in the territory of such other country.
(ii) A good that is produced in the territory of Chile or of the United States, or both, by one or more producers, is an originating good if the good satisfies all of the applicable requirements of this note.
(g) Regional value content.
(i) Where a rule set forth in subdivision (n) of this note specifies a regional value content for a good, the regional value content of such good shall be calculated, at the choice of the person claiming the tariff treatment authorized by this note for such good, on the basis of the build-down method or the build-up method described below, unless otherwise specified in this note:
(A) For the build-down method, the regional value content may be calculated on the basis of the formula RVC = ((AV VNM $) / A V$ ) $\times 100$, where RVC is the regional value content, expressed as a percentage; $A V$ is the adjusted value; and VNM is the value of nonoriginating materials used by the producer in the production of the good; or
(B) For the build-up method, the regional value content may be calculated on the basis of the formula RVC $=(\mathrm{VOM} / \mathrm{AV}) \mathrm{x}$ 100 , where RVC is the regional value content, expressed as a percentage; AV is the adjusted value; and VOM is the value of originating materials used by the producer in the production of the good.
(ii) Value of materials.
(A) For purposes of calculating the regional value content of a good under subdivision (i) and for purposes of applying the de minimis provisions of subdivision (e) of this note, the value of a material is:
(1) in the case of a material imported by the producer of the good, the adjusted value of the material;
(2) in the case of a material acquired in the territory where the good is produced, except for a material to which subdivision (3) below applies, the producer's price actually paid or payable for the material;
(3) in the case of a material provided to the producer without charge, or at a price reflecting a discount or similar reduction, the sum of:
(I) all expenses incurred in the growth, production or manufacture of the material, including general expenses, and
(II) an amount for profit; or
(4) in the case of a material that is self-produced, the sum of-
(I) all expenses incurred in the production of the material, including general expenses, and
(II) an amount for profit.
(B) The value of materials may be adjusted as follows:
(1) for originating materials, the following expenses, if not included under subdivision (A) above, may be added to the value of the originating material:
(I) the costs of freight, insurance, packing and all other costs incurred in transporting the material to the location of the producer;
(II) duties, taxes and customs brokerage fees on the material paid in the territory of Chile or of the United States, or both, other than duties and taxes that are waived, refunded, refundable or otherwise recoverable, including credit against duty or tax paid or payable; and
(III) the cost of waste and spoilage resulting from the use of the material in the production of the good, less the value of renewable scrap or by-product; and
(2) for non-originating materials, if included under subdivision (A) above, the following expenses may be deducted from the value of the nonoriginating material:
(I) the costs of freight, insurance, packing and all other costs incurred in transporting the material to the location of the producer;
(II) duties, taxes and customs brokerage fees on the material paid in the territory of Chile or of the United States, or both, other than duties and taxes that are waived, refunded, refundable or otherwise recoverable, including credit against duty or tax paid or payable;
(III) the cost of waste and spoilage resulting from the use of the material in the production of the good, less the value of renewable scrap or by-products; or
(IV) the cost of originating materials used in the production of the nonoriginating material in the territory of Chile or of the United States.

Annotated for Statistical Reporting Purposes

GN p. 276
Chile
(C) Any cost or value referred to in this note shall be recorded and maintained in accordance with the generally accepted accounting principles applicable in the territory of the country in which the good is produced (whether Chile or the United States). Such principles are the principles, rules and procedures, including both broad and specific guidelines, that define the accounting practices accepted in the territory of Chile or of the United States, as the case may be.
(h) Accessories, spare parts or tools.

Accessories, spare parts or tools delivered with a good that form part of the good's standard accessories, spare parts or tools shall be treated as a material used in the production of the good, if:
(i) the accessories, spare parts or tools are classified with and not invoiced separately from the good; and
(ii) the quantities and value of the accessories, spare parts or tools are customary for the good.
(i) Fungible goods and materials.
(i) A person claiming the tariff treatment provided in this note for a good may claim that a fungible good or material is originating either based on the physical segregation of each fungible good or material or by using an inventory management method. For purposes of this subdivision, the term "inventory management method" means:
(A) averaging,
(B) "last-in, first-out,"
(C) "first-in, first out," or
(D) any other method that is recognized in the generally accepted accounting principles of the country in which the production is performed (whether Chile or the United States) or otherwise accepted by that country.

The term "fungible goods" or fungible materials" means goods or materials, as the case may be, that are interchangeable for commercial purposes and the properties of which are essentially identical.
(ii) A person selecting an inventory management method under subdivision (i) above for particular fungible goods or materials shall continue to use that method for those fungible goods or materials throughout the fiscal year of that person.
(j) Packaging materials and containers.
(i) Packaging materials and containers in which a good is packaged for retail sale, if classified with the good for which the tariff treatment under the terms of this note is claimed, shall be disregarded in determining whether all nonoriginating materials used in the production of the good undergo the applicable change in tariff classification set out in subdivision ( n ) of this note and, if the good is subject to a regional value-content requirement, the value of such packaging materials and containers shall be taken into account as originating or nonoriginating materials, as the case may be, in calculating the regional value content of the good.
(ii) Packing materials and containers for shipment shall be disregarded in determining whether-
(A) the nonoriginating materials used in the production of the good undergo an applicable change in tariff classification set out in subdivision ( n ) of this note; and
(B) the good satisfies a regional value-content requirement.
(k) Indirect materials.

An indirect material shall be considered to be an originating material for purposes of this note without regard to where it is produced. The term "indirect material" means a good used in the production, testing or inspection of a good but not physically incorporated
into the good, or a good used in the maintenance of buildings or the operation of equipment associated with the production of a good, including-
(i) fuel and energy;
(ii) tools, dies and molds;
(iii) spare parts and materials used in the maintenance of equipment or buildings;
(iv) lubricants, greases, compounding materials and other materials used in production or used to operate equipment and buildings;
(v) gloves, glasses, footwear, clothing, safety equipment and supplies;
(vi) equipment, devices and supplies used for testing or inspecting the goods;
(vii) catalysts and solvents; and
(viii) any other goods that are not incorporated into the good but the use of which in the production of the good can reasonably be demonstrated to be a part of that production.
(I) Record-keeping requirements and verification.
(i) An importer of a good, for which treatment as an originating good of a UCFTA country is claimed under the provisions of this note, shall make a written declaration that the good qualifies as originating, under the terms of applicable regulations, and shall be prepared to submit, upon request by the appropriate customs officer, a certificate of origin demonstrating that the good qualifies as an originating good under the provisions of this note, including pertinent cost and manufacturing information and all other information requested by such customs officer.
(ii) Importers shall maintain for a period of five years after the date of importation of the good a certificate of origin or other information demonstrating that the good qualifies as originating, and all other documents that are required under applicable regulations relating to the importation of the good, in relating to the importation of the good, including records concerning:
(A) the purchase of, cost of, value of and payment for the good;
(B) where appropriate, the purchase of, cost of, value of and payment for all materials, including indirect materials, used in the production of the good; and
(C) where appropriate, the production of the good in the form in which the good is exported;
and shall, upon request by the appropriate customs officer, make available such records as are necessary under applicable regulations to demonstrate that a good qualifies as an originating good under the provisions of this note.
(iii) For purposes of determining whether a good imported into the customs territory of the United States from the territory of Chile qualifies as an originating good under the provisions of this note, the appropriate customs officer may conduct a verification under such terms or procedures as the United States and Chile may agree, as set forth in pertinent regulations.
(m) Interpretation of rules of origin.
(i) Unless otherwise specified, a rule in subdivision ( n ) of this note that is set out adjacent and is applicable to a 6-digit subheading in the tariff schedule shall take precedence over a rule applicable to a 4 -digit heading superior thereto and covering the goods of such subheading. For purposes of this subdivision and subdivision ( n ) of this note, a tariff provision is a "heading" if its article description is not indented; a provision is a "subheading" if it is designated by 6 digits under the Harmonized Commodity Description and Coding System.
(ii) References to weight in the rules set forth in subdivision ( n ) of this note for goods provided for in chapters 1 through 24 of the tariff schedule are to dry weight, unless otherwise specified in the tariff schedule.
(iii) A requirement of a change in tariff classification in subdivision ( n ) of this note applies only to nonoriginating materials.

## Harmonized Tariff Schedule of the United States Revision 9 (2023)

## Chile

(iv) A good shall not be considered to be originating solely by virtue of having undergone:
(A) simple combining or packaging operations, or
(B) mere dilution with water or another substance that does not materially alter the characteristics of the good.
(v) For purposes of applying this note to goods of chapters 6 through 14, inclusive, agricultural and horticultural goods grown in the territory of Chile or of the United States shall be treated as originating therein even if grown from seed, bulbs, rootstock, cuttings, slips or other live parts of plants imported from a country other than Chile or the United States.
(vi) (A) For purposes of applying this note to goods of chapters 28 through 38, inclusive, the following provisions confer origin to a good of any heading or subheading in such chapters, except as otherwise specified in this subdivision.
(B) Notwithstanding subdivision (vi)(A), a good of chapters 28 through 38 is an originating good if it meets the applicable change in tariff classification or satisfies the applicable value content requirement specified in subdivision ( n ) of this note.
(C) A good of chapters 28 through 38, except goods of heading 3823, that results from a chemical reaction in the territory of Chile or of the United States, or both, shall be treated as an originating good. For purposes of such chapters, a "chemical reaction" is a process (including a biochemical process) that results in a molecule with a new structure by breaking intramolecular bonds and by forming new intramolecular bonds, or by altering the spatial arrangement of atoms in a molecule.

The following are not considered to be chemical reactions for the purposes of determining whether a good is originating:
(1) dissolving in water or in another solvent;
(2) the elimination of solvents, including solvent water; or
(3) the addition or elimination of water of crystallization.
(D) A good of chapters 28 through 38 that is subject to purification shall be treated as an originating good provided that the purification occurs in the territory of Chile or of the United States, or both, and results in the following:
(1) the elimination of 80 percent of the impurities; or
(2) the reduction or elimination of impurities resulting in a good suitable:
(I) as a pharmaceutical, medicinal, cosmetic, veterinary or food grade substance;
(II) as a chemical product or reagent for analytical, diagnostic or laboratory uses;
(III) as an element or component for use in micro-elements;
(IV) for specialized optical uses;
(V) for non-toxic uses for health and safety;
(VI) for biotechnical use;
(VII) as a carrier used in a separation process; or
(VIII) for nuclear grade uses.
(E) A good of chapters 30,31 or 33 through 38 , except for heading 3808 , shall be treated as an originating good if the deliberate and proportionally controlled mixing or blending (including dispersing) of materials to conform to predetermined specifications, resulting in the production of a good having physical or chemical characteristics that are relevant to the purposes or uses of the good and are different from the input materials, occurs in the territory of Chile or of the United States, or both.
(F) A good of chapters 30,31 or 33 shall be treated as an originating good if the deliberate and controlled modification in particle size of the good, including micronizing by dissolving a polymer and subsequent precipitation, other than by merely crushing or pressing, resulting in a good having a defined particle size, defined particle size distribution, or defined surface area, which is relevant to the purposes of the resulting good and have different physical or chemical characteristics from the input materials, occurs in the territory of Chile or of the United States, or both.
(G) A good of chapters 28 through 38 shall be treated as an originating good if the production of standards materials occurs in the territory of Chile or of the United States, or both. For the purposes of this note, "standards materials" (including standard solutions) are preparations suitable for analytical, calibrating or referencing uses, having precise degrees of purity or proportions that are certified by the manufacturer.
(H) A good of chapters 28 through 38 shall be treated as an originating good if the isolation or separation of isomers from mixtures of isomers occurs in the territory of Chile or of the United States, or both.
(I) A good that undergoes a change from one classification to another in the territory of Chile or of the United States, or both, as a result of the separation of one or more materials from a man-made mixture shall not be treated as an originating good unless the isolated material underwent a chemical reaction in the territory of Chile or of the United States, or both.

For the purposes of this note, goods of Morocco, as defined in subdivisions (b) through (h) of this note, that are imported into the customs territory of the United States and entered under a provision for which a rate of duty appears in the "Special" subcolumn of column 1 followed by the symbol "MA" in parentheses are eligible for the tariff treatment and quantitative limitations set forth in the "Special" subcolumn, in accordance with sections 201 through 203, inclusive, of the United States-Morocco Free Trade Agreement Implementation Act (Pub. L. 108-302; 118 Stat. 1103). For the purposes of this note, the term "UMFTA country" refers only to Morocco or to the United States.
(b) For the purposes of this note, subject to the provisions of subdivisions (c), (d), (e), (g) and (h) thereof, a good imported into the United States is eligible for treatment as an originating good of a UMFTA country under the terms of this note only if --
(i) the good is a good wholly the growth, product or manufacture of Morocco, the United States, or both;
(ii) the good is a new or different article of commerce that has been grown, produced or manufactured in the territory of Morocco or of the United States, or both, and that falls in a heading or subheading of the tariff schedule that is not covered by the product-specific rules of subdivision (h) of this note; and the sum of--
(A) the value of each material produced in the territory of Morocco or of the United States, or both, and
(B) the direct costs of processing operations performed in the territory of Morocco or the United States, or both,

(C) the cost of waste or spoilage resulting from the use of the material in the growth, production or manufacture of the good, less the value of recoverable scrap; and
(D) taxes or customs duties imposed on the material by Morocco, the United States, or both, if the taxes or customs duties are not remitted upon exportation from the territory of Morocco or of the United States, as the case may be.
(ii) If the relationship between the producer of a good and the seller of a material influenced the price actually paid or payable for the material, or if there is no price actually paid or payable by the producer for the material, the value of the material produced in the territory of Morocco or of the United States, or both, includes the following:
(A) all expenses incurred in the growth, production or manufacture of the material, including general expenses;
(B) a reasonable amount for profit; and
(C) freight, insurance, packing and all other costs incurred in transporting the material to the producer's plant.

(1) goods referred to in subdivisions (A) through (J) above, inclusive, or

(ii) Cumulation.
(A) An originating good or a material produced in the territory of Morocco or of the United States, or both, that is incorporated into a good in the territory of the other country shall be considered to originate in the territory of the other country.
(B) A good that is grown, produced or manufactured in the territory of Morocco or of the United States, or both, by one or more producers, is an originating good if the good satisfies all applicable requirements of this note.
(iii) Packaging and packing materials and containers for retail sale and shipment shall be disregarded in determining whether a good qualifies as an originating good, except to the extent that the value of such packaging and packing materials and containers have been included in meeting the requirements set forth in subdivision (b)(ii) of this note.
(iv) Definitions. For the purposes of this note:
(A) The term "direct costs of processing operations," with respect to a good, includes, to the extent they are includable in the appraised value of the good when imported into Morocco or the United States, as the case may be, the following:
(1) all actual labor costs involved in the growth, production or manufacture of the good, including fringe benefits, on-the-job training and the costs of engineering, supervisory, quality control and similar personnel;
(2) tools, dies, molds and other indirect materials, and depreciation on machinery and equipment that are allocable to the good;
(3) research, development, design, engineering and blueprint costs, to the extent that they are allocable to the good;
(4) costs of inspecting and testing the good; and
(5) costs of packaging the good for export to the territory of the other country.

The term "direct costs of processing operations" does not include costs that are not directly attributable to a good or are not costs of growth, production or manufacture of the good, such as profit and such as general expenses of doing business that are either not allocable to the good or are not related to the growth, production or manufacture of the good, such as administrative salaries, casualty and liability insurance, advertising and sales staff salaries, commission or expenses.
(B) The term "material" means a good, including a part or ingredient, that is used in the growth, production or manufacture of another good that is a new or different article of commerce that has been grown, produced or manufactured in Morocco, the United States or both; and
(C) The term "material produced in the territory of Morocco or of the United States, or both" means a good that is either wholly the growth, product or manufacture of Morocco, the United States, or both, or a new or different article of commerce that has been grown, produced or manufactured in the territory of Morocco or of the United States, or both.
(D) The term "new or different article of commerce" means, except as provided in this subdivision, a good that--
(1) has been substantially transformed from a good or material that is not wholly the growth, product or manufacture of Morocco, the United States, or both; and
(2) has a new name, character or use distinct from the good or material from which it was transformed,
but a good shall not be considered a new or different article of commerce by virtue of having undergone simple combining or packaging operations, or mere dilution with water or another substance that does not materially alter the characteristics of the good.
(E) The term "simple combining or packaging operations" means operations such as adding batteries to electronic devices, fitting together a small number of components by bolting, gluing or soldering, or packing or repacking components together.
(F) The term "recovered goods" means materials in the form of individual parts that result from--
(1) the complete disassembly of used goods into individual parts; and
(2) the cleaning, inspecting, testing or other processing of those parts that is necessary for improvement to sound working condition.
(G) The term "remanufactured good" means an industrial good assembled in the territory of Morocco or of the United State and that--
(1) is entirely or partially comprised of recovered goods;
(2) has a similar life expectancy to, and meets the same performance standards as, a like good that is new; and
(3) enjoys a factory warranty similar to that of a like good that is new.
(H) The term "substantially transformed" means, with respect to a good or a material, changed as the result of a manufacturing or processing operation so that--

## Harmonized Tariff Schedule of the United States Revision 9 (2023)

(1) (aa) the good or material is converted from a good that has multiple uses into a good or material that has limited uses;
(bb) the physical properties of the good or material are changed to a significant extent; or
(cc) the operation undergone by the good or material is complex by reason of the number of processes and materials involved and the time and level of skill required to perform those processes; and
(2) the good or material loses its separate identity in the manufacturing or processing operation.
(v) A good shall not be considered to be imported directly into the territory of the United States if, after exportation from the territory of Morocco or of the United States, the good undergoes production, manufacturing or any other operation outside the territory of Morocco or of the United States, other than unloading, reloading or any other operation necessary to preserve the good in good condition or to transport the good to the territory of Morocco or of the United States.
(e) Textile and apparel articles.
(i) Except as provided in subdivision (ii) below, a textile or apparel good that is not an originating good under the terms of this note, because certain fibers or yarns used in the production of the component of the good that determines the tariff classification of the good do not undergo an applicable change in tariff classification set out in subdivision (h) of this note, shall be considered to be an originating good if the total weight of all such fibers or yarns in that component is not more than seven percent of the total weight of that component. Notwithstanding the preceding sentence, a textile or apparel good containing elastomeric yarns in the component of the good that determines the tariff classification of the good shall be considered to be an originating good only if such yarns are wholly formed in the territory of Morocco or of the United States.
(ii) Notwithstanding the rules set forth in subdivision (h) of this note, textile and apparel goods classifiable as goods put up in sets for retail sale as provided for in general rule of interpretation 3 to the tariff schedule shall not be considered to be originating goods unless each of the goods in the set is an originating good or the total value of the nonoriginating goods in the set does not exceed ten percent of the value of the set determined for purposes of assessing customs duties.
(iii) For purposes of this note, in the case of a textile or apparel good that is a yarn, fabric or group of fibers, the term "component of the good that determines the tariff classification of the good" means all of the fibers in the yarn, fabric or group of fibers.
(f) Indirect materials.

Indirect materials shall be disregarded in determining whether a good qualifies as an originating good, except that the cost of such indirect materials may be included in meeting the requirements of subdivision (b)(ii) of this note. An "indirect material" means a good used in the growth, production, manufacture, testing or inspection of a good but not physically incorporated into the good, or a good used in the maintenance of buildings or the operation of equipment associated with the growth, production or manufacture of a good, including-
(i) fuel and energy;
(ii) tools, dies and molds;
(iii) spare parts and materials used in the maintenance of equipment or buildings;
(iv) lubricants, greases, compounding materials and other materials used in the growth, production or manufacture of a good or used to operate equipment and buildings;
(v) gloves, glasses, footwear, clothing, safety equipment and supplies;
(vi) equipment, devices and supplies used for testing or inspecting the good;
(vii) catalysts and solvents; and
(viii) any other goods that are not incorporated into the good but the use of which in the growth, production or manufacture of the good can reasonably be demonstrated to be a part of that growth, production or manufacture.
(g) Interpretation of rules of origin.
(i) For purposes of subdivision (h) of this note, a good is an originating good if--
(A) each of the nonoriginating materials used in the production of the good undergoes an applicable change in tariff classification specified in such subdivision (h) as a result of production occurring entirely in the territory of Morocco or of the United States, or both, or the good otherwise satisfies the applicable requirements of such subdivision where a change in tariff classification is not specified; and
(B) the good satisfies any other applicable requirements of this note.
(ii) For purposes of interpreting the rules of origin set forth in subdivision (h) of this note--
(A) the specific rule, or specific set of rules, that applies to a particular heading or subheading is set out immediately adjacent to the heading or subheading;
(B) a rule applicable to a subheading shall take precedence over a rule applicable to the heading which is parent to that subheading;
(C) a requirement of a change in tariff classification applies only to nonoriginating materials;
(D) a reference to a "chapter" is to a chapter of the tariff schedule; a reference to a "heading" is to a provision whose article description is not indented and which is designated by 4 digits, whether or not followed by subsequent zeroes; and a reference to a "subheading" is to a provision whose article description is indented and which is designated by 6 digits, whether or not followed by subsequent zeroes; and
(E) for purposes of textile and apparel goods, a good is considered to be "wholly" of a material if the good is entirely made of the named material.
(h) Product-specific rules of origin.
(i) With respect to goods not described in subdivision (b)(i) of this note, when such goods fall in the enumerated provisions set forth herein and the importer claims the treatment provided under this note with respect to such goods, the rules in this subdivision apply in lieu of the provisions of subdivision (b)(ii) of this note.
(ii) Certain dairy and dairy-containing products.

A good containing over 10 percent by weight of cow's milk solids that is classified in chapter 4 or heading 1901, 2105, 2106 or 2202 must be made from originating cow's milk, but the use of nonoriginating sheep's or goat's milk in a good classified in chapter 4 or heading 1901, 2105, 2106 or 2202 shall not render the good nonoriginating.
(iii) Products provided for in section II of the tariff schedule. [NOT UPDATED FOR PRES.PROC. 8097 or 8771]

Section rule: An agricultural or horticultural good grown in the territory of Morocco or of the United States shall be treated as an originating good even if grown from a nonoriginating seed, bulb, rootstock, cutting, slip, graft, shoot, bud or other live part of a plant.

(e) De minimis.
(i) Except as provided in subdivision (e)(ii) below, a good (other than a textile or apparel good described in subdivision (d) above) that does not undergo a change in tariff classification pursuant to subdivision ( n ) of this note shall nonetheless be considered to be an originating good if-
(A) the value of all nonoriginating materials that are used in the production of the good, and do not undergo the applicable change in tariff classification, does not exceed 10 percent of the adjusted value of the good;
(B) the value of such nonoriginating materials is included in calculating the value of nonoriginating materials for any applicable regional value content requirement for the good; and
(C) the good meets all other applicable requirements of this note.
(ii) Subdivision (e)(i) does not apply to-
(A) a nonoriginating material provided for in chapter 4 or in subheading 1901.90 that is used in the production of a good provided for in chapter 4;

(H) a nonoriginating material used in the production of a good provided for in chapters 1 through 21, inclusive, unless the nonoriginating material is provided for in a different subheading than the good for which origin is being determined under this note.
(f) Accumulation.
(i) For purposes of this note, originating materials from the territory of Australia or of the United States that are used in the production of a good in the territory of the other country shall be considered to originate in the territory of such other country.
(ii) A good that is produced in the territory of Australia or of the United States, or both, by one or more producers, is an originating good if the good satisfies all of the applicable requirements of this note.
(g) Regional value content.
(i) For purposes of subdivision (b)(ii)(B) of this note, the regional value content for a good, except for goods to which subdivision (iv) applies, shall be calculated by the importer, exporter or producer of the good on the basis of the build-down method or the build-up method described below, unless otherwise specified in this note:
(A) For the build-down method, the regional value content may be calculated on the basis of the formula RVC $=(\mathrm{AV}-\mathrm{VNM})$ X 100 / AV, where RVC is the regional value content, expressed as a percentage; AV is the adjusted value; and VNM is the value of nonoriginating materials that are acquired and used by the producer in the production of the good, but does not include the value of a material that is self-produced; or
(B) For the build-up method, the regional value content may be calculated on the basis of the formula $R V C=(\underline{V O M} \times 100) /$ $A V$, where RVC is the regional value content, expressed as a percentage; $A V$ is the adjusted value; and VOM is the value of originating materials that are acquired or self-produced, and used by the producer in the production of the good.
(ii) Value of materials.
(A) For purposes of calculating the regional value content of a good under this note and for purposes of applying the de minimis provisions of subdivision (e) of this note, the value of a material is:
(1) in the case of a material imported by the producer of the good, the adjusted value of the material;
(2) in the case of a material acquired in the territory in which the good is produced, determined in accordance with Articles 1 through 8, article 15 and the corresponding interpretive notes of the Agreement on Implementation of Article VII of the General Agreement on Tariffs and Trade 1994 referred to in section 101(d)(8) of the Uruguay Round Agreements Act, as set forth in regulations promulgated by the Secretary of the Treasury providing for the application of such Articles in the absence of an importation; or
(3) in the case of a material that is self-produced, the sum of--
(I) all expenses incurred in the production of the material, including general expenses; and
(II) an amount for profit equivalent to the profit added in the normal course of trade.
(B) The value of materials may be adjusted as follows:
(1) for originating materials, the following expenses, if not included under subdivision (g)(ii)(A) of this note, may be added to the value of the originating material:
(I) the costs of freight, insurance, packing and all other costs incurred in transporting the material within or between the territory of Australia, the United States or both, to the location of the producer;
(II) duties, taxes and customs brokerage fees on the material paid in the territory of Australia or of the United States, or both, other than duties and taxes that are waived, refunded, refundable or otherwise recoverable, including credit against duty or tax paid or payable; and
(III) the cost of waste and spoilage resulting from the use of the material in the production of the good, less the value of renewable scrap or by-products;
(2) for non-originating materials, if included in the value of a nonoriginating material calculated under subdivision (g)(ii)(A) of this note, the following expenses may be deducted from the value of the nonoriginating material:
(I) the costs of freight, insurance, packing and all other costs incurred in transporting the material within or between the territory of Australia, the United States or both, to the location of the producer;
(II) duties, taxes and customs brokerage fees on the material paid in the territory of Australia or of the United States, or both, other than duties and taxes that are waived, refunded, refundable or otherwise recoverable, including credit against duty or tax paid or payable;

Australia
(III) the cost of waste and spoilage resulting from the use of the material in the production of the good, less the value of renewable scrap or by-products;
(IV) the cost of processing incurred in the territory of Australia or of the United States, or both, in the production of the nonoriginating material; and
(V) the cost of originating materials used in the production of the nonoriginating material in the territory of Australia or of the United States, or both
(C) Any cost or value referred to in this note shall be recorded and maintained in accordance with the generally accepted accounting principles applicable in the territory of the country in which the good is produced (whether Australia or the United States). Such principles comprise the recognized consensus or substantial authoritative support in the territory of Australia or of the United States, as the case may be, with respect to the recording of revenues, expenses, costs, assets and liabilities, the disclosure of information and the preparation of financial statements. These standards may encompass broad guidelines of general application as well as detailed standards, practices and procedures.
(D) For purposes of subdivision (g) of this note, the term "used" means used or consumed in the production of goods.
(iii) Special rule for certain automotive goods.
(A) For purposes of subdivision (b)(ii)(B) of this note, the regional value content of an automotive good shall be calculated by the importer, exporter or producer of the good on the basis of the following net cost method: RVC = (NC - VNM) X 100 / NC, where RVC is the regional value content of the automotive good, expressed as a percentage; NC is the net cost of the automotive good; and VNM means the value of nonoriginating materials that are acquired and used by the producer in the production of the automotive good, but does not include the value of a material that is self produced. For purposes of this subdivision, the term "automotive good" means a good provided for in any of the subheadings 8407.31 through 8407.34, subheading 8408.20, heading 8409 or any of headings 8701 through 8708 , inclusive, of the tariff schedule.
(B) For purposes of determining the regional value content under this subdivision for an automotive good that is a motor vehicle provided for in any of headings 8701 through 8705, an importer, exporter or producer may average the amounts calculated under the formula contained in subdivision (A) above, over the producer's fiscal year--
(I) with respect to all motor vehicles in any one of the categories described in subdivision (C), below; or
(II) with respect to all motor vehicles in any such category that are exported to the territory of the United States or Australia.
(C) A category is described for purposes of subdivision (B)(I) above if it--
(I) is the same model of motor vehicles, is in the same class of vehicles, and is produced in the same plant in the territory of Australia or of the United States, as the good described in subdivision (B) for which regional value content is being calculated;
(II) is the same class of motor vehicles, and is produced in the same plant in the territory of Australia or of the United States, as the good described in subdivision (B) for which regional value content is being calculated; or
(III) is the same model line of motor vehicles produced in either the territory of Australia or of the United States, as the good described in subdivision (B) for which regional value content is being calculated.
(D) For purposes of determining the regional value content under subdivision (A) above for automotive goods provided for in any of subheadings 8407.31 through 8407.34 , in subheading 8408.20 or in heading $8409,8705,8707$ or 8708 , that are produced in the same plant, an importer, exporter or producer may--
(I) average the amounts calculated under the formula contained in subdivision (A) above over--
(aa) the fiscal year of the motor vehicle producer to whom the automotive goods are sold,
(bb) any quarter or month, or
(cc) its own fiscal year,
if the goods were produced during the fiscal year, quarter or month that is the basis for the calculation;
(II) determine the average referred to in subdivision (I) separately for such goods sold to one or more motor vehicle producers; or
(III) make a separate determination under subdivision (I) or (II) for automotive goods that are exported to the territory of the United States or of Australia.
(E) Consistent with the provisions regarding allocation of costs set out in generally accepted accounting principles, the net cost of the automotive good under subdivision (B) shall be calculated by--
(I) calculating the total cost incurred with respect to all goods produced by the producer of the automotive good, subtracting any sales promotion, marketing and after-sales service costs, royalties, shipping and packing costs and nonallowable interest costs that are included in the total cost of all such goods, and then reasonably allocating the resulting net cost of those goods to the automotive good;
(II) calculating the total cost incurred with respect to all goods produced by that producer, reasonably allocating the total cost to the automotive good, and then subtracting any sales promotion, marketing and after-sales services costs, royalties, shipping and packing costs and nonallowable interest costs that are included in the portion of the total cost allocated to the automotive good; or
(III) reasonably allocating each cost that forms part of the total cost incurred with respect to the automotive good so that the aggregate of these costs does not include any sales promotion, marketing and after-sales costs, royalties, shipping and packing costs or nonallowable interest costs.
(F) For purposes of this note, the term "class of motor vehicles" means any one of the following categories of motor vehicles:
(I) motor vehicles provided for in subheading 8701.20, 8704.10, 8704.22, $8704.23,8704.32$ or 8704.90 , or heading 8705 or 8706 , or motor vehicles for the transport of 16 or more persons provided for in subheading 8702.10 or 8702.90;
(II) motor vehicles provided for in subheading 8701.10 or any of subheadings 8701.30 through 8701.90 , inclusive;
(III) motor vehicles for the transport of 15 or fewer persons provided for in subheading 8702.10 or 8702.90 , or motor vehicles provided for in subheading 8704.21 or 8704.31 ; or
(IV) motor vehicles provided for in any of subheadings 8703.21 through 8703.90.
(G) For purposes of this note, the term "model line" means a group of motor vehicles having the same platform or model name.
(H) For purposes of this note, the term "nonallowable interest costs" means interest costs incurred by a producer that exceed 700 basis points above the applicable official interest rate for comparable maturities of the country (whether Australia or the United States).
(I) For purposes of this note, the term "reasonably allocating" means apportioning in a manner that would be appropriate under generally accepted accounting principles.
(J) For purposes of this note, the term "total cost" means all product costs, period costs and other costs for a good incurred in the territory of Australia or of the United States, or both.
(h) Accessories, spare parts or tools.

## Harmonized Tariff Schedule of the United States Revision 9 (2023)

## Australia

(i) Subject to subdivision (h)(ii) below, accessories, spare parts or tools delivered with a good that form part of the good's standard accessories, spare parts or tools shall--
(A) be treated as originating goods if the good is an originating good; and
(B) be disregarded in determining whether all the nonoriginating materials used in the production of the good undergo the applicable change in tariff classification set out in subdivision (n) of this note.
(ii) Subdivision (i) above shall apply only if--
(A) the accessories, spare parts or tools are not invoiced separately from the good;
(B) the quantities and value of the accessories, spare parts or tools are customary for the good; and
(C) if the good is subject to a regional value content requirement, the value of the accessories, spare parts or tools is taken into account as originating or nonoriginating materials, as the case may be, in calculating the regional value content of the good.
(i) Fungible goods and materials.
(i) A person claiming that a fungible good or fungible material is an originating good may base the claim either on the physical segregation of the fungible good or fungible material or by using an inventory management method with respect to the fungible good or fungible material. For purposes of this subdivision, the term "inventory management method" means:
(A) averaging,
(B) "last-in, first-out,"
(C) "first-in, first out," or
(D) any other method that is recognized in the generally accepted accounting principles of the country in which the production is performed (whether Australia or the United States) or otherwise accepted by that country.

The term "fungible good" or fungible material" means a good or material, as the case may be, that is interchangeable with another good or material for commercial purposes and the properties of which are essentially identical to such other good or material.
(ii) A person selecting an inventory management method under subdivision (i) above for a particular fungible good or fungible material shall continue to use that method for that fungible good or fungible material throughout the fiscal year of that person.
(j) Packaging materials and containers.
(i) Packaging materials and containers in which a good is packaged for retail sale, if classified with the good for which the tariff treatment under the terms of this note is claimed, shall be disregarded in determining whether all nonoriginating materials used in the production of the good undergo the applicable change in tariff classification set out in subdivision ( n ) of this note and, if the good is subject to a regional value content requirement, the value of such packaging materials and containers shall be taken into account as originating or nonoriginating materials, as the case may be, in calculating the regional value content of the good.
(ii) Packing materials and containers for shipment shall be disregarded in determining whether-
(A) the nonoriginating materials used in the production of the good undergo the applicable change in tariff classification set out in subdivision ( $n$ ) of this note; and
(B) the good satisfies a regional value content requirement.
(k) Indirect materials.

An indirect material shall be considered to be an originating material for purposes of this note without regard to where it is produced, and its value shall be the cost registered in the accounting records of the producer of the good. The term "indirect material" means a good used in the production, testing or inspection of a good but not physically incorporated into the good, or a good used in the maintenance of buildings or the operation of equipment associated with the production of a good, including-
(i) fuel and energy;
(ii) tools, dies and molds;
(iii) spare parts and materials used in the maintenance of equipment or buildings;
(iv) lubricants, greases, compounding materials and other materials used in production or used to operate equipment and buildings;
(v) gloves, glasses, footwear, clothing, safety equipment and supplies;
(vi) equipment, devices and supplies used for testing or inspecting the goods;
(vii) catalysts and solvents; and
(viii) any other goods that are not incorporated into the good but the use of which in the production of the good can reasonably be demonstrated to be a part of that production.
(I) Record-keeping requirements and verification.
(i) An importer of a good, for which treatment as an originating good of a UAFTA country is claimed under the provisions of this note, shall make a written declaration that the good qualifies as originating, under the terms of applicable regulations, and shall be prepared to submit, upon request by the appropriate customs officer, a statement setting forth the reasons that the good qualifies as an originating good under the provisions of this note, including pertinent cost and manufacturing information and all other information requested by such customs officer.
(ii) Importers shall maintain, for a period prescribed in applicable regulations and starting on the date of importation of the good, all information demonstrating that the good qualifies as originating in a format that may be provided for in such regulations, along with all other required documents relating to the importation of the good, including records concerning:
(A) the purchase of, cost of, value of and payment for the good;
(B) where appropriate, the purchase of, cost of, value of and payment for all materials, including indirect materials, used in the production of the good; and
(C) where appropriate, the production of the good in the form in which the good is exported;
and shall, upon request by the appropriate customs officer, make available such records as are necessary under applicable regulations to demonstrate that a good qualifies as an originating good under the provisions of this note.
(iii) For purposes of determining whether a good imported into the customs territory of the United States from the territory of Australia qualifies as an originating good under the provisions of this note, the appropriate customs officer may conduct a verification under such terms or procedures as the United States and Australia may agree, as set forth in pertinent regulations.
(m) Interpretation of rules of origin.
(i) Unless otherwise specified, the requirements of any rule in subdivision ( n ) of this note that is set out adjacent to a heading or subheading of the tariff schedule and specifies a change of tariff classification applies only to nonoriginating materials. For purposes of this subdivision and subdivision ( $n$ ) of this note, a tariff provision is a "heading" if its article description is not indented; a provision is a "subheading" if it is designated by 6 digits under the Harmonized Commodity Description and Coding System.

## Harmonized Tariff Schedule of the United States Revision 9 (2023)

## Australia

(ii) Where a specific rule in subdivision ( n ) of this note is defined using the criterion of a change in tariff classification, and the rule is written to exclude tariff provisions at the level of a chapter, heading or subheading of the tariff schedule, such rule shall be construed to require that materials classified in those excluded provisions be originating for the good to qualify as originating.
(iii) When a heading or subheading of the tariff schedule is subject to alternative specific rules in subdivision ( n ) of this note, the rule will be considered to be met if a good satisfies one of the alternatives.
(iv) When a single rule applies to a group of headings or subheadings, and that rule specifies a change of heading or subheading, the requirement shall be considered to permit a change within a single heading or subheading in such group or between headings or subheadings of that group. When, however, a rule requires a change in heading or subheading from a provision "outside that group" such change in heading or subheading must occur from a heading or subheading that is outside the group of headings or subheadings set out in the rule.
(v) References to weight in the rules set forth in subdivision ( n ) of this note for goods provided for in chapters 1 through 24 of the tariff schedule are to dry weight, unless otherwise specified in the tariff schedule.
(vi) For purposes of applying this note to goods of chapters 6 through 14, inclusive, agricultural and horticultural goods grown in the territory of Australia or of the United States shall be treated as originating therein even if grown from seed, bulbs, rootstock, cuttings, grafts, shoots, buds or or other live parts of plants imported from a country other than Australia or the United States.
(vii) Any good of chapters 27 through 40, inclusive (except a good of heading 3823), of the tariff schedule, that is the product of a chemical reaction shall be considered to be an originating good if the chemical reaction occurred in the United States or Australia. Notwithstanding any of the individual tariff classification rules, this "chemical reaction" rule may be applied to any good classified in the above chapters. For purposes of applying this note to goods of the above chapters, a "chemical reaction" is a process (including a biochemical process) which results in a molecule with a new structure by breaking intramolecular bonds and by forming new intramolecular bonds, or by altering the spatial arrangement of atoms in a molecule. The following are not considered to be chemical reactions for purposes of this note:
(A) dissolving in water or other solvents;
(B) the elimination of solvents including solvent water; or
(C) the addition or elimination of water of crystallization.
(viii) For the purposes of chapters 28 through 35 and chapters 38 and 39 , purification is considered to be origin conferring under this note provided that one of the following criteria is satisfied:
(A) purification of a good resulting in the elimination of 80 percent by weight of the content of existing impurities; or
(B) reduction or elimination of impurities resulting in a good suitable for one or more of the following applications:
(I) pharmaceutical, medicinal, cosmetic, veterinary or food grade substances;
(II) chemical products and reagents for analytical, diagnostic or laboratory uses;
(III) elements and components for use in micro-elements;
(IV) specialized optical uses;
(V) non-toxic uses for health and safety;
(VI) biotechnical use;
(VII) carriers used in a separation process; or
(VIII) nuclear grade uses.
(ix) For the purposes of chapters 30 and 31, heading 3302, subheading 3502.20, headings 3506 through 3507, heading 3707 and chapters 39 and 40 , the deliberate and proportionally controlled mixing or blending (including dispersing) of materials to conform to predetermined specifications which results in the production of a good having physical or chemical characteristics which are relevant to the purposes or uses of the good and are different from the input materials is considered to be origin conferring for purposes of this note.
(x) For the purposes of chapters 30,31 and 39, the following shall be considered to be origin conferring for purposes of this note:
(A) the deliberate and controlled reduction in particle size of a good, other than by merely crushing (or pressing) resulting in a good having a defined particle size, defined particle size distribution or defined surface area, which are relevant to the purposes of the resulting good and have different physical or chemical characteristics from the input materials; or
(B) the deliberate and controlled modification in particle size of a good, other than by merely pressing, resulting in a good having a defined particle size, defined particle size distribution or defined surface area, which are relevant to the purposes of the resulting good and have different physical or chemical characteristics from the input materials.
(xi) For the purposes of chapters 28 through 32, 35 and 38 , the production of standards materials is considered to be origin conferring for purposes of this note. The term "standards materials" (including standard solutions) means preparations suitable for analytical, calibrating or reference uses having precise degrees of purity or proportions which are certified by the manufacturer.
(xii) For the purposes of chapters 28 through 32, 35 and 39 , the isolation or separation of isomers from mixtures of isomers shall be considered origin conferring for purposes of this note.
(xiii) For the purposes of chapters 28 through 38, a nonoriginating material/component will not be deemed to have satisfied all applicable requirements of these rules by reason of a change from one tariff classification to another merely as the result of the separation of one or more individual materials or components from a man-made mixture unless the isolated material/component, itself, also underwent a chemical reaction.

(iii) A good that has undergone production necessary to qualify as an originating good under this note shall not be considered to be an originating good if, subsequent to that production, the good--
(A) undergoes further production or any other operation outside the territories of the parties to the Agreement, other than unloading, reloading or any other operation necessary to preserve the good in good condition or to transport the good to the territory of a party to the Agreement; or
(B) does not remain under the control of customs authorities in the territory of a country other than a party to the Agreement.
(iv) Accumulation.
(A) Originating materials from the territory of one or more of the parties to the Agreement that are used in the production of a good in the territory of another party to the Agreement shall be considered to originate in the territory of that other party to the Agreement.
(B) A good that is produced in the territory of one or more of the parties to the Agreement by one or more producers is an originating good if the good satisfies the requirements of this note.
(v) Goods classifiable as goods put up in sets.--Notwithstanding the rules set forth in subdivision ( n ) of this note, goods classifiable as goods put up in sets for retail sale as provided under general rule of interpretation 3 to the tariff schedule shall not be considered to be originating goods unless--
(A) each of the goods in the set is an originating good; or
(B) the total value of the nonoriginating goods in the set does not exceed-
(1) in the case of a textile or apparel good, 10 percent of the adjusted value of the set; or
(2) in the case of a good, other than a textile or apparel good, 15 percent of the adjusted value of the set.
(d) Textile and apparel goods.
(i) A textile or apparel good that is not an originating good under the terms of this note, because certain fibers or yarns used in the production of the component of the good that determines the tariff classification of the good do not undergo an applicable change in tariff classification set out in subdivision ( n ) of this note, shall be considered an originating good if--
(A) the total weight of all such fibers or yarns in that component is not more than ten percent of the total weight of that component; or
(B) such yarns are nylon filament yarns (other than elastomeric yarn) provided for in subheading 5402.11.30, 5402.11.60, $5402.19 .30,5402.19 .60,5402.31 .30,5402.31 .60,5402.32 .30,5402.32 .60,5402.45 .10,5402.45 .90,5402.51 .00$ or 5402.61 .00 of the tariff schedule from a country that is a party to an agreement with the United States establishing a free trade area which entered into force before January 1, 1995.

Notwithstanding the preceding sentence, a textile or apparel good containing elastomeric yarns in the component of the good that determines the tariff classification of the good shall be considered to be an originating good only if such yarns are wholly formed in the territory of a party to the Agreement.
(ii) For the purposes of this subdivision--

# Harmonized Tariff Schedule of the United States Revision 9 (2023) 

Annotated for Statistical Reporting Purposes
GN p. 454
DR-CAFTA
(A) the term "elastomeric" does not include latex; and
(B) a yarn is wholly formed in the territory of a party to the Agreement if all of the production processes and finishing operations, starting with the extrusion of filaments, strips, film or sheet, and including slitting a film or sheet into strip, or the spinning of all fibers into yarn, or both, and ending with a finished yarn or plied yarn, took place in the territory of a party to the Agreement.
(iii) For the purposes of subdivision (d)(i) or (d)(ii) of this note, in the case of a good that is a yarn, fabric or fiber, the term "component of the good that determines the tariff classification of the good" means all of the fibers in the good.
(iv) For a textile or apparel good provided for in chapters 61 through 63 of the tariff schedule that is not an originating good and for which the duty treatment set forth in subheading 9822.05.10 is claimed, the rate of duty set forth in the general subcolumn of rate of duty column 1 shall apply only on the value of the assembled good minus the value of fabrics formed in the United States, components knit-to-shape in the United States and any other materials of U.S. origin used in the production of the good, provided that the good is sewn or otherwise assembled in the territory of a party to the Agreement (other than the United States) with thread wholly formed in the United States, from fabrics wholly formed in the United States and cut in one or more parties to the Agreement or from components knit-to-shape in the United States, or both. For purposes of this subdivision--
(1) a fabric is wholly formed in the United States if all the production processes and finishing operations, starting with the weaving, knitting, needling, tufting, felting, entangling or other process, and ending with a fabric ready for cutting or assembly without further processing, took place in the United States; and
(2) a thread is wholly formed in the United States if all the production processes, starting with the extrusion of filaments, strips, film or sheet, and including slitting a film or sheet into strip, or the spinning of all fibers into thread, or both, and ending with thread, took place in the United States.
(v) For the purposes of this note, the term "textile or apparel good" means a good listed in the Annex to the Agreement on Textiles and Clothing referred to in section 101(d)(4) of the Uruguay Round Agreements Act (19 U.S.C. 3511 (d)(4)); but such term does not encompass the following goods that are listed in Annex 3.29 of the Agreement specified in subdivision (a) of this note: wadding, gauze, bandages and the like (subheading 3005.90); woven, knitted or nonwoven fabrics coated, covered or laminated with plastics (subheading 3921.12, 3921.13 or 3921.90 ); footwear with soles and uppers of wool felt (subheading 6405.20); footwear uppers of which 50 percent or more of the external surface is textile material (subheading 6406.10); leg warmers and gaiters of textile material (subheading 6406.99); hat forms, hat bodies and hoods of felt and plateaux and manchons of felt (heading 6501); hat shapes, plaited or made by assembling strips of any material (heading 6502); felt hats and other felt headgear (heading 6503); hats and other headgear, plaited or made by assembling strips of any material (heading 6504); hats and other headgear, knitted or made up from lace or other textile material (subheading 6505.90); safety seat belts for motor vehicles (subheading 8708.21); parachutes, parts thereof and accessories therefor (heading 8804); watch straps, bands and bracelets of textile materials (subheading 9113.90); garments for dolls (subheading 9502.91); and woven ribbons of manmade fibers, other than those measuring less than 30 mm in width and permanently put up in cartridges (subheading 9612.10).
(vi) With respect to a textile and apparel good as defined in subdivision (d)(v) of this note, the term "wholly" means that the good is entirely of the named material.
(vii) Notwithstanding other provisions of this note, for purposes of determining whether a good of chapter 62 of the tariff schedule is an originating good, materials used in the production of such a good that are produced in the territory of Canada or of Mexico and that would be originating under this note if produced in the territory of a party to the Agreement shall be considered as having been produced in the territory of a party to the Agreement, provided that the United States Trade Representative has determined in a notice published in the Federal Register that the requirements of Appendix 4.1-B of the Agreement specified in subdivision (a) of this note have been met with respect to Canada or Mexico, as the case may be, and has announced the effective date of U.S. note 21 to subchapter XXII of chapter 98 of the tariff schedule. Such goods shall be entered under subheading 9822.05 .05 of the tariff schedule, subject to the terms of such U.S. note 21, on or after the effective date specified in such notice. [Compiler's Note: effective with respect to materials from MX, $8 / 15 / 08$; reference to subheading 9822.05 .05 is obsolete and current provisions appear to be 9822.05.11 and 9822.05.13.]
(e) De minimis amounts of nonoriginating materials.
(i) Except as provided in subdivisions (d)(i), (e)(ii) and (m) below, a good that does not undergo a change in tariff classification pursuant to subdivision ( n ) of this note is an originating good if--
(A) the value of all nonoriginating materials that--
(1) are used in the production of the good, and
(2) do not undergo the applicable change in tariff classification set out in subdivision (n) of this note, does not exceed 10 percent of the adjusted value of the good;
(B) the value of such nonoriginating materials is included in the value of nonoriginating materials for any applicable regional value content requirement for the good; and
(C) the good meets all other applicable requirements of this note.
(ii) Subdivision (e)(i) does not apply to--
(A) a nonoriginating material provided for in chapter 4, or a nonoriginating dairy preparation containing over 10 percent by weight of milk solids provided for in subheading 1901.90 or 2106.90 , that is used in the production of a good provided for in chapter 4;
(B) a nonoriginating material provided for in chapter 4, or a nonoriginating dairy preparation containing over 10 percent by weight of milk solids provided for in subheading 1901.90, that is used in the production of the following goods:
(1) infant preparations containing over 10 percent by weight of milk solids provided for in subheading 1901.10;

(I) except as provided in subdivisions (e)(ii)(A) through (e)(ii)(H) above and in subdivision (n) of this note, a nonoriginating material used in the production of a good provided for in any of chapters 1 through 24, inclusive, unless the nonoriginating material is provided for in a different subheading than the good for which origin is being determined under this note.

## DR-CAFTA

(f) Regional value content.
(i) For purposes of subdivision (b)(ii)(B) of this note, except for goods to which subdivision (f)(iii) applies, the regional value content of a good referred to in subdivision ( $n$ ) of this note, shall be calculated by the importer, exporter or producer of the good on the basis of the build-down method or the build-up method described below.
(A) For the build-down method, the regional value content of a good may be calculated on the basis of the formula

RVC $=((A V-V N M) / A V) \times 100$
where RVC is the regional value content of the good, expressed as a percentage; $A V$ is the adjusted value of the good; and VNM is the value of nonoriginating materials that are acquired and used by the producer in the production of the good, but does not include the value of a material that is self-produced.
(B) For the build-up method, the regional value content of a good may be calculated on the basis of the formula

RVC $=((\mathrm{VOM}) / \mathrm{AV}) \times 100$
where RVC is the regional value content of the good, expressed as a percentage; $A V$ is the adjusted value of the good; and VOM is the value of originating materials that are acquired or self-produced, and used by the producer in the production of the good.
(ii) Value of materials.
(A) For the purpose of calculating the regional value content of a good under this note, and for purposes of applying the de minimis rules under subdivision (e) of this note, the value of a material is--
(1) in the case of a material that is imported by the producer of the good, the adjusted value of the material;
(2) in the case of a material acquired in the territory in which the good is produced, the value, determined in accordance with Articles 1 through 8, Article 15, and the corresponding interpretive notes of the Agreement on Implementation of Article VII of the General Agreement on Tariffs and Trade 1994 referred to in section 101(d)(8) of the Uruguay Round Agreements Act, as set forth in regulations promulgated by the Secretary of the Treasury providing for the application of such Articles in the absence of an importation; or
(3) in the case of a material that is self-produced, the sum of--
(I) all expenses incurred in the production of the material, including general expenses; and
(II) an amount for profit equivalent to the profit added in the normal course of trade.
(B) The following expenses, if not included in the value of an originating material calculated under subdivision (f)(ii)(A) above, may be added to the value of the originating material:
(1) the costs of freight, insurance, packing and all other costs incurred in transporting the material within or between the territory of one or more of the parties to the Agreement to the location of the producer;
(2) duties, taxes and customs brokerage fees on the material paid in the territory of one or more of the parties to the Agreement, other than duties or taxes that are waived, refunded, refundable or otherwise recoverable, including credit against duty or tax paid or payable;
(3) the cost of waste and spoilage resulting from the use of the material in the production of the good, less the value of renewable scrap or byproducts.
(C) The following expenses, if included in the value of a nonoriginating material calculated under subdivision (f)(ii)(A) above, may be deducted from the value of the nonoriginating material:
(1) the costs of freight, insurance, packing and all other costs incurred in transporting the material within or between the territory of one or more of the parties to the Agreement to the location of the producer;

## Harmonized Tariff Schedule of the United States Revision 9 (2023)

(2) duties, taxes and customs brokerage fees on the material paid in the territory of one or more of the parties to the Agreement, other than duties or taxes that are waived, refunded, refundable or otherwise recoverable, including credit against duty or tax paid or payable;
(3) the cost of waste and spoilage resulting from the use of the material in the production of the good, less the value of renewable scrap or byproducts;
(4) the cost of originating materials used in the production of the nonoriginating material in the territory of one or more of the parties to the Agreement.
(iii) Special rule for certain automotive goods.
(A) For purposes of subdivision (b)(ii)(B) of this note, the regional value content of an automotive good referred to in subdivision $(n)$ of this note may be calculated by the importer, exporter or producer of the good on the basis of the following net cost method:
$R V C=((N C-V N M) / N C) \times 100$
where RVC is the regional value content of the automotive good, expressed as a percentage; NC is the net cost of the automotive good; and VNM means the value of nonoriginating materials that are acquired and used by the producer in the production of the automotive good, but does not include the value of a material that is self-produced. For purposes of this subdivision, the term "automotive good" means a good provided for in any of subheadings 8407.31 through 8407.34, subheading 8408.20 , heading 8409 or in any of headings 8701 through 8708 , inclusive, of the tariff schedule.
(B) For purposes of determining the regional value content under this subdivision for an automotive good that is a motor vehicle provided for in any of headings 8701 through 8705 , an importer, exporter or producer may average the amounts calculated under the formula contained in subdivision $(A)$ above, over the producer's fiscal year--
(1) with respect to all motor vehicles in any one of the categories described in subdivision (C), below; or
(2) with respect to all motor vehicles in any such category that are exported to the territory of one or more of the parties to the Agreement.
(C) A category is described for purposes of subdivision $(B)(1)$ above if it--
(1) is the same model line of motor vehicles, is in the same class of vehicles, and is produced in the same plant in the territory of a party to the Agreement, as the good described in subdivision (B) for which regional value content is being calculated;
(2) is the same class of motor vehicles, and is produced in the same plant in the territory of a party to the Agreement, as the good described in subdivision (B) for which regional value content is being calculated; or
(3) is the same model line of motor vehicles produced in the territory of a party to the Agreement, as the good described in subdivision (B) for which regional value content is being calculated.
(D) For purposes of determining the regional value content under subdivision (A) above for automotive goods provided for in any of subheadings 8407.31 through 8407.34 , in subheading 8408.20 or in heading $8409,8706,8707$ or 8708 , that are produced in the same plant, an importer, exporter or producer may--
(1) average the amounts calculated under the formula contained in subdivision (A) above over--
(I) the fiscal year of the motor vehicle producer to whom the automotive goods are sold,
(II) any quarter or month, or
(III) its own fiscal year,
if the goods were produced during the fiscal year, quarter or month that is the basis for the calculation;

## Harmonized Tariff Schedule of the United States Revision 9 (2023)

(2) determine the average referred to in subdivision (1) separately for such goods sold to one or more motor vehicle producers; or
(3) make a separate determination under subdivision (1) or (2) for automotive goods that are exported to the territory of one or more of the parties to the Agreement.
(E) The importer, exporter or producer shall, consistent with the provisions regarding allocation of costs set out in generally accepted accounting principles, determine the net cost of an automotive good under subdivision (B) by--
(1) calculating the total cost incurred with respect to all goods produced by the producer of the automotive good, subtracting any sales promotion, marketing and after-sales service costs, royalties, shipping and packing costs and nonallowable interest costs that are included in the total cost of all such goods, and then reasonably allocating the resulting net cost of those goods to the automotive good;
(2) calculating the total cost incurred with respect to all goods produced by that producer, reasonably allocating the total cost to the automotive good, and then subtracting any sales promotion, marketing and after-sales service costs, royalties, shipping and packing costs and nonallowable interest costs that are included in the portion of the total cost allocated to the automotive good; or
(3) reasonably allocating each cost that forms part of the total cost incurred with respect to the automotive good so that the aggregate of all such costs does not include any sales promotion, marketing and after-sales service costs, royalties, shipping and packing costs or nonallowable interest costs.
(F) For purposes of this note, the term "class of motor vehicles" means any one of the following categories of motor vehicles:
(1) motor vehicles provided for in subheading 8701.20, 8704.10, 8704.22, 8704.23, 8704.32 or 8704.90, or heading 8705 or 8706, or motor vehicles for the transport of 16 or more persons provided for in subheading 8702.10 or 8702.90 ;
(2) motor vehicles provided for in subheading 8701.10 or any of subheadings 8701.30 through 8701.90 , inclusive;
(3) motor vehicles for the transport of 15 or fewer persons provided for in subheading 8702.10 or 8702.90 , or motor vehicles provided for in subheading 8704.21 or 8704.31 ; or
(4) motor vehicles provided for in any of subheadings 8703.21 through 8703.90, inclusive.
(G) For purposes of this note, the term "model line" means a group of motor vehicles having the same platform or model name.
(H) For purposes of this note, the term "nonallowable interest costs" means interest costs incurred by a producer that exceed 700 basis points above the applicable official interest rate for comparable maturities of the party to the Agreement in which the producer is located.
(I) For purposes of this note, the term "reasonably allocate" means to apportion in a manner that would be appropriate under generally accepted accounting principles.
(J) For purposes of this note, the term "total cost" means all product costs, period costs and other costs for a good incurred in the territory of one or more of the parties to the Agreement.
(g) Accessories, spare parts or tools.
(i) Subject to subdivision (g)(ii) and (g)(iii), accessories, spare parts or tools delivered with a good that form part of the good's standard accessories, spare parts or tools shall--
(A) be treated as originating goods if the good is an originating good; and
(B) be disregarded in determining whether all the nonoriginating materials used in the production of the good undergo the applicable change in tariff classification set out in subdivision ( $n$ ) of this note.
(ii) Subdivision (g)(i) shall apply only if--
(A) the accessories, spare parts or tools are classified with and not invoiced separately from the good, regardless of whether they appear specified or separately identified in the invoice for the good; and
(B) the quantities and value of the accessories, spare parts or tools are customary for the good.
(iii) If the good is subject to a regional value content requirement, the value of the accessories, spare parts or tools shall be taken into account as originating or nonoriginating materials, as the case may be, in calculating the regional value content of the good.
(h) Fungible goods and materials.
(i) A person claiming that a fungible good or fungible material is an originating good may base the claim either on the physical segregation of the fungible good or fungible material or by using an inventory management method with respect to the fungible good or fungible material. For purposes of this subdivision, the term "inventory management method" means:
(A) averaging,
(B) "last-in, first-out,"
(C) "first-in, first out," or
(D) any other method that is recognized in the generally accepted accounting principles of the party to the Agreement in which the production is performed or otherwise accepted by that country.

The term "fungible good" or fungible material" means a good or material, as the case may be, that is interchangeable with another good or material for commercial purposes and the properties of which are essentially identical to such other good or material.
(ii) A person selecting an inventory management method under subdivision (h)(i) for a particular fungible good or fungible material shall continue to use that method for that fungible good or fungible material throughout the fiscal year of that person.
(i) Packaging or packing materials and containers.
(i) For retail sale.--Packaging materials and containers in which a good is packaged for retail sale, if classified with the good, shall be disregarded in determining whether all the nonoriginating materials used in the production of the good undergo the applicable change in tariff classification set out in subdivision ( $n$ ) of this note and, if the good is subject to a regional value content requirement, the value of such packaging materials and containers shall be taken into account as originating or nonoriginating materials, as the case may be, in calculating the regional value content of the good.
(ii) For shipment.--Packing materials and containers for shipment shall be disregarded in determining whether a good is an originating good.
(j) Indirect materials.

An indirect material shall be treated as an originating material for purposes of this note without regard to where it is produced. The term "indirect material" means a good used in the production, testing or inspection of a good but not physically incorporated into the good, or a good used in the maintenance of buildings or the operation of equipment associated with the production of a good, including-
(i) fuel and energy;
(ii) tools, dies and molds;
(iii) spare parts and materials used in the maintenance of equipment or buildings;
(iv) lubricants, greases, compounding materials and other materials used in production or used to operate equipment or buildings;
(v) gloves, glasses, footwear, clothing, safety equipment and supplies;

## Harmonized Tariff Schedule of the United States Revision 9 (2023)

GN p. 460

## DR-CAFTA

(vi) equipment, devices and supplies used for testing or inspecting the good;
(vii) catalysts and solvents; and
(viii) any other goods that are not incorporated into the good but the use of which in the production of the good can reasonably be demonstrated to be a part of that production.
(k) For the purposes of this note, the term "generally accepted accounting principles" means the recognized consensus or substantial authoritative support in the territory of a party to the Agreement with respect to the recording of revenues, expenses, costs, assets and liabilities, the disclosure of information and the preparation of financial statements. The principles may encompass broad guidelines of general application as well as detailed standards, practices and procedures.
(I) Claims for preferential tariff treatment; record-keeping requirements and verification.
(i) Claims for preferential tariff treatment.--An importer may make a claim for the tariff and other treatment provided for under the terms of this note based on either--
(A) a written or electronic certification by the importer, exporter or producer; or
(B) the importer's knowledge that the good is an originating good, including reasonable reliance on information in the importer's possession that the good is an originating good;
in such form and manner as may be required in applicable regulations.
(ii) Record-keeping requirements.--An importer of a good, for which entry is claimed under the terms of this note, shall maintain, for a minimum of five years from the date of importation of the good, all records and documents necessary to demonstrate that the good qualified for the tariff and other treatment provided for under the terms of this note, in such form and manner as may be required in applicable regulations.
(iii) Verification.--For purposes of determining whether a good imported into the customs territory of the United States from the territory of another party to the Agreement qualifies as an originating good under the provisions of this note, the appropriate customs officer may conduct a verification as set forth in pertinent regulations.
(m) Interpretation and application of rules of origin.
(i) Unless otherwise specified, the requirements of any rule in subdivision ( n ) of this note that is set out adjacent to a heading or subheading of the tariff schedule and specifies a change of tariff classification applies only to nonoriginating materials. For purposes of this subdivision and subdivision ( n ) of this note, a tariff provision is a "heading" if its article description is not indented; a provision is a "subheading" if it is designated by 6 digits under the Harmonized Commodity Description and Coding System; and the terms "chapter" and "section" refer to a chapter or section, respectively, of the tariff schedule.
(ii) Where a specific rule in subdivision ( n ) of this note is defined using the criterion of a change in tariff classification, and the rule is written to exclude tariff provisions at the level of a chapter, heading or subheading of the tariff schedule, such rule shall be construed to require that materials classified in those excluded provisions be originating for the good to qualify as originating.
(iii) When a heading or subheading of the tariff schedule is subject to alternative specific rules in subdivision ( n ) of this note, the rule will be considered to be met if a good satisfies one of the alternatives.
(iv) When a single rule is applicable to a group of headings or subheadings, and that rule of origin specifies a change of heading or subheading, the requirement shall be interpreted so that the change of heading or subheading may occur within a single heading or subheading or between headings or subheadings of the group. When, however, a rule refers to a change in heading or subheading "outside that group," such change in heading or subheading must occur from a heading or subheading that is outside the group of headings or subheadings set out in the rule.
(v) References to weight in the rules set forth in subdivision ( n ) of this note for goods provided for in chapters 1 through 24 of the tariff schedule are to dry weight, unless otherwise specified in the tariff schedule.
(vi) For purposes of applying this note to goods of chapters 6 through 14, inclusive, agricultural and horticultural goods shall be treated as originating in the territory of a party to the Agreement even if grown from seeds, bulbs, rootstock, cuttings, grafts, shoots, buds or other live parts of plants imported from a country other than a party to the Agreement.
(vii) This subdivision confers origin on the goods specified in the provisions below, except as otherwise specified herein. Notwithstanding the preceding sentence, a good is originating if it meets the applicable change in tariff classification rules specified in subdivision ( n ) of this note.
(A) A good of chapters 27 through 40, inclusive (except a good of heading 3823), of the tariff schedule, that is the product of a chemical reaction in the territory of one or more of the parties to the Agreement shall be treated as originating. For purposes of applying this subdivision to goods of the foregoing chapters, a "chemical reaction" is a process (including a biochemical process) that results in a molecule with a new structure by breaking intramolecular bonds and by forming new intramolecular bonds, or by altering the spatial arrangement of atoms in a molecule. The following are not considered to be chemical reactions for purposes of determining whether a good is originating:
(1) dissolution in water or in another solvent;
(2) the elimination of solvents, including solvent water; or
(3) the addition or elimination of water of crystallization.
(B) For the purposes of chapters 28 through 35 and chapters 38 and 39 , a good that is subject to purification shall be treated as originating provided that one of the following occurs in the territory of one or more of the parties to the Agreement:
(1) the purification results in the elimination of 80 percent of the impurities; or
(2) the purification results in the reduction or elimination of impurities, rendering the good suitable:
(I) as a pharmaceutical, medicinal, cosmetic, veterinary or food grade substance;
(II) as a chemical good or reagent for analytical, diagnostic or laboratory uses;
(III) as an element or component for use in micro-elements;
(IV) for specialized optical uses;
(V) for non toxic uses for health and safety;
(VI) for biotechnical use;
(VII) as a carrier used in a separation process; or
(VIII)for nuclear grade uses.
(C) A good of chapters 30 or 31, heading 3302, subheading 3502.20, headings 3506 through 3507, inclusive, heading 3707 or chapters 39 or 40 shall be treated as originating if the deliberate and proportionally controlled mixing or blending (including dispersing) of materials to conform to predetermined specifications, resulting in the production of a good having physical or chemical characteristics which are relevant to the purposes or uses of the good and are different from the input materials, occurs in the territory of one or more of the parties to the Agreement.
(D) A good of chapter 30,31 or 39 shall be treated as originating if the following occurs in the territory of one or more of the parties to the Agreement:
(1) the deliberate and controlled reduction in particle size of a good, other than by merely crushing (or pressing), resulting in a good having a defined particle size, defined particle size distribution or defined surface area, which are relevant to the purposes of the resulting good and have different physical or chemical characteristics from the input materials; or

(iii) Packaging and packing materials and containers for retail sale and for shipment.

Packaging and packing materials and containers for retail sale and shipment shall be disregarded in determining whether a good qualifies as an originating good, except that the value of such packaging and packing materials and containers has been included in meeting the requirements set forth in subdivision (b)(ii) of this note.
(iv) Definitions. For the purposes of this note:
(A) The term "direct costs of processing operations," with respect to a good, includes, to the extent they are includable in the appraised value of the good when imported into Bahrain or the United States, as the case may be, the following:
(1) all actual labor costs involved in the growth, production or manufacture of the good, including fringe benefits, on-the-job training and the cost of engineering, supervisory, quality control and similar personnel;
(2) tools, dies, molds and other indirect materials, and depreciation on machinery and equipment that are allocable to the good;
(3) research, development, design, engineering and blueprint costs, to the extent that they are allocable to the good;
(4) costs of inspecting and testing the good; and
(5) costs of packaging the good for export to the territory of the other country.

The term "direct costs of processing operations" does not include costs that are not directly attributable to the good or are not costs of growth, production or manufacture of the good, such as: (I) profit, and (II) general expenses of doing business that are either not allocable to the good or are not related to the growth, production or manufacture of the good, such as administrative salaries, casualty and liability insurance, advertising and salesmen's staff salaries, commissions or expenses.
(B) The term "material" means a good, including a part or ingredient, that is used in the growth, production or manufacture of another good that is a new or different article of commerce that has been grown, produced or manufactured in Bahrain or of the United States, or both.
(C) The term "material produced in the territory of Bahrain or of the United States, or both" means a good that is either wholly the growth, product or manufacture of Bahrain or of the United States, or both, or a new or different article of commerce that has been grown, produced or manufactured in the territory of Bahrain or of the United States, or both.
(D) The term "new or different article of commerce" means, except as provided in this subdivision, a good that--
(1) has been substantially transformed from a good or material that is not wholly the growth, product or manufacture of Bahrain or of the United States, or both; and
(2) has a new name, character or use distinct from the good or material from which it was transformed,
but a good shall not be considered a new or different article of commerce by virtue of having undergone simple combining or packaging operations, or mere dilution with water or another substance that does not materially alter the characteristics of the good.
(E) The term "simple combining or packaging operations" means operations such as adding batteries to devices, fitting together a small number of components by bolting, gluing or soldering, and repacking or packaging components together.
(F) The term "recovered goods" means materials in the form of individual parts that result from--
(1) the complete disassembly of used goods into individual parts; and
(2) the cleaning, inspecting, testing or other processing of those parts that is necessary for improvement to sound working condition.
(G) The term "remanufactured good" means an industrial good that is assembled in the territory of Bahrain or of the United State and that--
(1) is entirely or partially comprised of recovered goods;
(2) has a similar life expectancy to, and meets similar performance standards as, a like good that is new; and
(3) enjoys a factory warranty similar to that of a like good that is new.
(H) The term "substantially transformed" means, with respect to a good or a material, changed as the result of a manufacturing or processing operation so that--
(1) (aa) the good or material is converted from a good that has multiple uses into a good or material that has limited uses;
(bb) the physical properties of the good or material are changed to a significant extent; or
(cc) the operation undergone by the good or material is complex by reason of the number of processes and materials involved and the time and level of skill required to perform those processes; and
(2) the good or material loses its separate identity in the manufacturing or processing operation.
(v) A good shall not be considered to be imported directly into the territory of the United States from the territory of Bahrain for purposes of this note if, after exportation from the territory of Bahrain or of the United States, the good undergoes production, manufacturing or any other operation outside the territory of Bahrain or of the United States, other than unloading, reloading or any other operation necessary to preserve the good in good condition or to transport the good to the territory of Bahrain or of the United States.
(e) Textile and apparel articles.
(i) Except as provided in subdivision (ii) below, a textile or apparel good that is not an originating good under the terms of this note, because certain fibers or yarns used in the production of the component of the good that determines the tariff classification of the good do not undergo an applicable change in tariff classification set out in subdivision ( h ) of this note, shall be considered to be an originating good if the total weight of all such fibers or yarns in that component is not more than seven percent of the total weight of that component. Notwithstanding the preceding sentence, a textile or apparel good containing elastomeric yarns in the component of the good that determines the tariff classification of the good shall be considered to be an originating good only if such yarns are wholly formed in the territory of Bahrain or of the United States.
(ii) Notwithstanding the rules set forth in subdivision (h) of this note, textile and apparel goods classifiable as goods put up in sets for retail sale as provided for in general rule of interpretation 3 to the tariff schedule shall not be considered to be originating goods unless each of the goods in the set is an originating good or the total value of the nonoriginating goods in the set does not exceed ten percent of the value of the set determined for purposes of assessing customs duties.
(iii) For purposes of this note, in the case of a textile or apparel good that is a yarn, fabric or group of fibers, the term "component of the good that determines the tariff classification of the good" means all of the fibers in the yarn, fabric or group of fibers.
(iv) For purposes of this note, the term "textile or apparel good" means a good listed in the Annex to the Agreement on Textiles and Clothing referred to in section 101(d)(4) of the Uruguay Round Agreements Act (19 U.S.C. 3511(d)(4)).
(f) Indirect materials.

Indirect materials shall be disregarded in determining whether a good qualifies as an originating good, except that the cost of such indirect materials may be included in meeting the 35 percent value-content requirement of subdivision (b)(ii) of this note where applicable. An "indirect material" means a good used in the growth, production, manufacture, testing or inspection of a good but not physically incorporated into the good, or a good used in the maintenance of buildings or the operation of equipment associated with the growth, production or manufacture of a good, including-
(i) fuel and energy;
(ii) tools, dies and molds;
(iii) spare parts and materials used in the maintenance of equipment and buildings;
(iv) lubricants, greases, compounding materials and other materials used in the growth, production or manufacture of a good or used to operate equipment and buildings;
(v) gloves, glasses, footwear, clothing, safety equipment and supplies;
(vi) equipment, devices and supplies used for testing or inspecting the good;
(vii) catalysts and solvents; and
(viii) any other goods that are not incorporated into the good but the use of which in the growth, production or manufacture of the good can reasonably be demonstrated to be a part of that growth, production or manufacture.

## Chapter 96.

Heading Rule: For purposes of determining whether a good of this heading other than of textile wadding is originating, the rule applicable to that good shall only apply to the component that determines the tariff classification of the good and such component must satisfy the tariff change requirements set out in the rule for that good.

1. (A) A change to sanitary towels (pads) and tampons and similar articles of textile wadding of heading 9619 from any other chapter, except from headings 5106 through 5113,5204 through 5212,5307 through 5308 or 5310 through 5311 or chapters 54 through 55 ; or

2. United States-Oman Free Trade Agreement Implementation Act.
(a) Originating goods under the terms of the United States-Oman Free Trade Agreement (UOFTA) are subject to duty as provided for herein. For the purposes of this note, goods of Oman, as defined in subdivisions (b) through (h) of this note, that are imported into the customs territory of the United States and entered under a provision for which a rate of duty appears in the "Special" subcolumn of column 1 followed by the symbol "OM" in parentheses are eligible for the tariff treatment and quantitative limitations set forth in the "Special" subcolumn, in accordance with sections 201 through 203, inclusive, of the United States-Oman Free Trade Agreement Implementation Act (Pub. L. 109-283). For the purposes of this note, the term "UOFTA country" refers only to Oman or to the United States.
(b) For the purposes of this note, subject to the provisions of subdivisions (c), (d), (e), (g) and (h) thereof, a good imported into the United States is eligible for treatment as an originating good of a UOFTA country under the terms of this note only if --
(i) the good is a good wholly the growth, product or manufacture of Oman or of the United States, or both;
(ii) for goods not covered by subdivision (iii) below, the good is a new or different article of commerce that has been grown, produced or manufactured in the territory of Oman or of the United States, or both, and the sum of--
(A) the value of each material produced in the territory of Oman or of the United States, or both, and
(B) the direct costs of processing operations performed in the territory of Oman or of the United States, or both,
is not less than 35 percent of the appraised value of the good at the time the good is entered into the territory of the United States; or
(iii) the good falls in a heading or subheading covered by a provision set forth subdivision (h) of this note and--
(A) each of the nonoriginating materials used in the production of the good undergoes an applicable change in tariff classification specified in such subdivision ( h ) as a result of production occurring entirely in the territory of Oman or of the United States, or both; or
(B) the good otherwise satisfies the requirements specified in such subdivision (h);
and is imported directly into the territory of the United States from the territory of Oman and meets all other applicable requirements of this note. For purposes of this note, the term "good" means any merchandise, product, article or material. For purposes of subdivision (b)(ii), the formula for calculating whether the value of materials produced in the territory of one or both of the parties plus the direct costs of processing operations performed in the territory of one or both of the parties is not less than 35 percent of the appraised value of the good is (VOM + DCP)/AV X 100, where VOM is the value of a material produced in the territory of one
or both of the parties as set forth in subdivision (c) of this note, DCP is the direct cost of processing operations as defined in subdivision (d)(iv)(A) of this note, and AV is the appraised value of the good.
(c) Value of materials.
(i) Except as provided in subdivision (c)(ii) of this note, the value of a material produced in the territory of Oman or of the United States, or both, includes the following:
(A) the price actually paid or payable by the producer of the good for the material;
(B) when not included in the price actually paid or payable by the producer of the good for the material, the freight, insurance, packing and all other costs incurred in transporting the material to the producer's plant;
(C) the cost of waste or spoilage, less the value of recoverable scrap; and
(D) taxes or customs duties imposed on the material by Oman or by the United States, or both, provided the taxes or customs duties are not remitted upon exportation.
(ii) Where the relationship between the producer of the good and the seller of the material influenced the price actually paid or payable for the material, or if subdivision (c)(i)(A) of this note is otherwise not applicable, the value of the material produced in the territory of Oman or of the United States, or both, includes the following:
(A) all expenses incurred in the growth, production or manufacture of the material, including general expenses;
(B) a reasonable amount for profit; and
(C) freight, insurance, packing and all other costs incurred in transporting the material to the producer's plant.
(d)
(i) For purposes of subdivision (b)(i) of this note, except as otherwise provided in subdivision (e) of this note for textile and apparel articles, the expression "goods wholly the growth, product or manufacture of Oman or of the United States, or both" means--
(A) mineral goods extracted in the territory of Oman or of the United States, or both;
(B) vegetable goods, as such a good is provided for in the tariff schedule, harvested in the territory of Oman or of the United States, or both;
(C) live animals born and raised in the territory of Oman or of the United States, or both;
(D) goods obtained from live animals raised in the territory of Oman or of the United States, or both;

(J) waste and scrap derived from-

## Harmonized Tariff Schedule of the United States Revision 9 (2023)

(1) production or manufacture in the territory of Oman or of the United States, or both; or
(2) used goods collected in the territory of Oman or of the United States, or both, if such goods are fit only for the recovery of raw materials;
(K) recovered goods derived in the territory of Oman or of the United States from used goods, and utilized in the territory of that country in the production of remanufactured goods; and
(L) goods produced in the territory of Oman or of the United States, or both, exclusively--
(1) from goods referred to in subdivisions (A) through (J) above, inclusive, or
(2) from the derivatives of goods referred to in such subdivisions,
at any stage of production.
(ii) Cumulation.
(A) An originating good or a material produced in the territory of Oman or of the United States, or both, that is incorporated into a good in the territory of the other country shall be considered to originate in the territory of the other country.
(B) A good that is grown, produced or manufactured in the territory of Oman or of the United States, or both, by one or more producers, is an originating good if the good satisfies the requirements of subdivision (b) of this note and all other applicable requirements of this note.
(C) Direct costs of processing operations performed in the territory of Oman or of the United States, or both, as well as the value of materials produced in the territory of Oman or of the United States, or both, may be counted without limitation toward satisfying the 35 percent value-content requirement specified in subdivision (b)(ii) of this note.
(iii) Packaging and packing materials and containers in which a good is packaged for retail sale and for shipment, if classified with the good, shall be disregarded in determining whether a good qualifies as an originating good, except that the value of originating packaging and packing materials and containers may be counted toward satisfying, where applicable, the 35 percent value-content requirement specified in subdivision (b)(ii) of this note.
(iv) Definitions. For the purposes of this note:
(A) The term "direct costs of processing operations" means those costs either directly incurred in, or that can reasonably be allocated to, the growth, production or manufacture of the good, including the following, to the extent they are includable in the appraised value of goods when imported into Oman or the United States, as the case may be, the following:
(1) all actual labor costs involved in the growth, production or manufacture of the good, including fringe benefits, on-the-job training and the cost of engineering, supervisory, quality control and similar personnel;
(2) tools, dies, molds and other indirect materials, and depreciation on machinery and equipment that are allocable to the specific good;
(3) research, development, design, engineering and blueprint costs, to the extent that they are allocable to the specific good;
(4) costs of inspecting and testing the specific good; and
(5) costs of packaging the specific good for export to the territory of the other country.

The term "direct costs of processing operations" does not include costs that are not directly attributable to the good or are not costs of growth, production or manufacture of the good, such as: (I) profit, and (II) general expenses of doing business that are either not allocable to the specific good or are not related to the growth, production or manufacture of the good, such as administrative salaries, casualty and liability insurance, advertising and salesmen's staff salaries, commissions or expenses.
(B) The term "material" means a good, including a part or ingredient, that is used in the growth, production or manufacture of another good that is a new or different article of commerce that has been grown, produced or manufactured in Oman or of the United States, or both.
(C) The term "material produced in the territory of Oman or of the United States, or both" means a good that is either wholly the growth, product or manufacture of Oman or of the United States, or both, or a new or different article of commerce that has been grown, produced or manufactured in the territory of Oman or of the United States, or both.
(D) The term "new or different article of commerce" means, except as provided in this subdivision, a good that--
(1) has been substantially transformed from a good or material that is not wholly the growth, product or manufacture of Oman, the United States, or both; and
(2) has a new name, character or use distinct from the good or material from which it was transformed,
but a good shall not be considered a new or different article of commerce by virtue of having merely undergone (I) simple combining or packaging operations, or (II) mere dilution with water or another substance that does not materially alter the characteristics of the good.
(E) The term "simple combining or packaging operations" means operations such as adding batteries to devices, fitting together a small number of components by bolting, gluing or soldering, and repacking or packaging components together.
(F) The term "recovered goods" means materials in the form of individual parts that result from--
(1) the complete disassembly of used goods into individual parts; and
(2) the cleaning, inspecting, testing or other processing of those parts as necessary for improvement to sound working condition.
(G) The term "remanufactured goods" means industrial goods that are assembled in the territory of Oman or of the United State and that--
(1) are entirely or partially comprised of recovered goods;
(2) have similar life expectancies as new goods; and
(3) enjoy similar factory warranties as such new goods.
(H) The term "substantially transformed" means, with respect to a good or a material, changed as the result of a manufacturing or processing operation so that--
(1) (aa) the good or material has multiple uses and is converted into a good with limited uses;
(bb) the physical properties of the good or material are changed to a significant extent; or
(cc) the operation undergone by the good or material is complex in terms of the number of different processes and materials involved, as well as the time and level of skill required to perform those processes; and
(2) the good or material loses its separate identity in the resulting, new good or material.
(v) A good shall not be considered to be imported directly into the territory of the United States from the territory of Oman for purposes of this note if the good undergoes production, manufacturing or any other operation outside the territory of Oman or of the United States, other than unloading, reloading or any other operation necessary to preserve the good in good condition or to transport the good to the territory of Oman or of the United States.
(e) Textile and apparel articles.

GN p. 566
Oman
(i) Except as provided in subdivision (ii) below, a textile or apparel good that is not an originating good under the terms of this note, because certain fibers or yarns used in the production of the component of the good that determines the tariff classification of the good do not undergo an applicable change in tariff classification set out in subdivision (h) of this note, shall be considered to be an originating good if the total weight of all such fibers or yarns in that component is not more than seven percent of the total weight of that component. Notwithstanding the preceding sentence, a textile or apparel goodcontaining elastomeric yarns in the component of the good that determines the tariff classification of the good shall be considered to be an originating good only if such yarns are wholly formed in the territory of Oman or of the United States. For purposes of this note, in the case of a textile or apparel good that is a yarn, fabric or group of fibers, the term "component of the good that determines the tariff classification of the good" means all of the fibers in the yarn, fabric or group of fibers.
(ii) Notwithstanding the rules set forth in subdivision (h) of this note, textile and apparel goods classifiable under general rule of interpretation 3 to the tariff schedule as goods put up in sets for retail sale shall not be considered to be originating goods unless each of the goods in the set is an originating good or the total value of the nonoriginating goods in the set does not exceed ten percent of the customs value of the set.
(iii) For purposes of this note, the term "textile or apparel good" means a good listed in the Annex to the Agreement on Textiles and Clothing referred to in section 101(d)(4) of the Uruguay Round Agreements Act (19 U.S.C. 3511(d)(4)).
(iv) [Subdivision deleted.]
(f) Indirect materials.

Indirect materials shall be disregarded in determining whether a good qualifies as an originating good, except that the cost of such indirect materials may be included in meeting the 35 percent value-content requirement of subdivision (b)(ii) of this note, where applicable. An "indirect material" means a good used in the growth, production, manufacture, testing or inspection of a good but not physically incorporated into the good, or a good used in the maintenance of buildings or the operation of equipment associated with the growth, production or manufacture of a good, including-
(i) fuel and energy;
(ii) tools, dies and molds;
(iii) spare parts and materials used in the maintenance of equipment and buildings;

(vi) equipment, devices and supplies used for testing or inspecting the good;
(vii) catalysts and solvents; and
(viii) any other goods that are not incorporated into the good but the use of which in the growth, production or manufacture of the good can reasonably be demonstrated to be a part of that growth, production or manufacture.
(g) Interpretation of rules of origin.

For purposes of interpreting the rules of origin set forth in subdivision (h) of this note--
(i) the specific rule, or specific set of rules, that applies to a particular heading or subheading is set out immediately adjacent to the heading or subheading;
(ii) a rule applicable to a subheading shall take precedence over a rule applicable to the heading which is parent to that subheading;
(iii) a requirement of a change in tariff classification applies only to non-originating materials; and

(f) Regional value content.
(i) For purposes of subdivision (b)(ii)(B) of this note, except for goods to which subdivision (f)(iii) applies, the regional value content of a good referred to in subdivision ( $n$ ) of this note, shall be calculated by the importer, exporter or producer of the good on the basis of the build-down method or the build-up method described below.
(A) For the build-down method, the regional value content of a good may be calculated on the basis of the formula RVC $=((\mathrm{AV}-\mathrm{VNM}) / \mathrm{AV}) \times 100$ where RVC is the regional value content of the good, expressed as a percentage; AV is the adjusted value of the good; and VNM is the value of nonoriginating materials that are acquired and used by the producer in the production of the good, but does not include the value of a material that is self-produced.
(B) For the build-up method, the regional value content of a good may be calculated on the basis of the formula

RVC $=((\mathrm{VOM} / \mathrm{AV}) \times 100$
where RVC is the regional value content of the good, expressed as a percentage; $A V$ is the adjusted value of the good; and VOM is the value of originating materials that are acquired or self-produced, and used by the producer in the production of the good.
(ii) Value of materials.
(A) For the purpose of calculating the regional value content of a good under this note, and for purposes of applying the de minimis rules under subdivision (e) of this note, the value of a material is--
(1) in the case of a material that is imported by the producer of the good, the adjusted value of the material;
(2) in the case of a material acquired in the territory in which the good is produced, the value, determined in accordance with Articles 1 through 8, Article 15 and the corresponding interpretive notes of the Agreement on Implementation of Article VII of the General Agreement on Tariffs and Trade 1994 referred to in section 101(d)(8) of the Uruguay Round Agreements Act, as set forth in regulations promulgated by the Secretary of the Treasury providing for the application of such Articles in the absence of an importation by the producer; or
(3) in the case of a material that is self-produced, the sum of--
(I) all expenses incurred in the production of the material, including general expenses; and
(II) an amount for profit equivalent to the profit added in the normal course of trade.
(B) The following expenses, if not included in the value of an originating material calculated under subdivision (f)(ii)(A) above, may be added to the value of the originating material:
(1) the costs of freight, insurance, packing and all other costs incurred in transporting the material within or between the territory of Peru, the United States, or both, to the location of the producer;
(2) duties, taxes and customs brokerage fees on the material paid in the territory of Peru, the United States, or both, other than duties or taxes that are waived, refunded, refundable or otherwise recoverable, including credit against duty or tax paid or payable;
(3) the cost of waste and spoilage resulting from the use of the material in the production of the good, less the value of renewable scrap or byproducts.
(C) The following expenses, if included in the value of a nonoriginating material calculated under subdivision (f)(ii)(A) above, may be deducted from the value of the nonoriginating material:
(1) the costs of freight, insurance, packing and all other costs incurred in transporting the material within or between the territory of Peru, the United States, or both, to the location of the producer;
(2) duties, taxes and customs brokerage fees on the material paid in the territory of Peru, the United States, or both, other than duties or taxes that are waived, refunded, refundable or otherwise recoverable, including credit against duty or tax paid or payable;
(3) the cost of waste and spoilage resulting from the use of the material in the production of the good, less the value of renewable scrap or byproducts;
(4) the cost of originating materials used in the production of the nonoriginating material in the territory of Peru, the United States, or both.
(iii) Special rule for certain automotive goods.
(A) For purposes of subdivision (b)(ii)(B) of this note, the regional value content of an automotive good referred to in subdivision $(\mathrm{n})$ of this note may be calculated by the importer, exporter or producer of the good on the basis of the following net cost method:

RVC $=((N C-V N M) / N C) \times 100$
where RVC is the regional value content of the automotive good, expressed as a percentage; NC is the net cost of the automotive good; and VNM means the value of nonoriginating materials that are acquired and used by the producer in the production of the automotive good, but does not include the value of a material that is self-produced. For purposes of this subdivision, the term "automotive good" means a good provided for in any of subheadings 8407.31 through 8407.34, subheading 8408.20 , heading 8409 or in any of headings 8701 through 8708 , inclusive, of the tariff schedule.
(B) For purposes of determining the regional value content under this subdivision for an automotive good that is a motor vehicle provided for in any of headings 8701 through 8705 , an importer, exporter or producer may average the amounts calculated under the formula contained in subdivision (A) above, over the producer's fiscal year--
(1) with respect to all motor vehicles in any one of the categories described in subdivision (C), below; or
(2) with respect to all motor vehicles in any such category that are exported to the territory of Peru or the United States.
(C) A category is described for purposes of subdivision (B)(1) above if it--
(1) is the same model line of motor vehicles, is in the same class of vehicles and is produced in the same plant in the territory of Peru or the United States, as the good described in subdivision (B) for which regional value content is being calculated;
(2) is the same class of motor vehicles, and is produced in the same plant in the territory of Peru or the United States, as the good described in subdivision (B) for which regional value content is being calculated; or
(3) is the same model line of motor vehicles produced in the territory of Peru or the United States as the good described in subdivision (B) for which regional value content is being calculated.
(D) For purposes of determining the regional value content under subdivision (A) above for automotive materials provided for in any of subheadings 8407.31 through 8407.34 , in subheading 8408.20 or in heading $8409,8706,8707$ or 8708 , that are produced in the same plant, an importer, exporter or producer may--
(1) average the amounts calculated under the formula contained in subdivision (A) above over--
(I) the fiscal year of the motor vehicle producer to whom the automotive goods are sold,
(II) any quarter or month, or
(III) the fiscal year of the producer of such goods,
if the goods were produced during the fiscal year, quarter or month that is the basis for the calculation;
(2) determine the average referred to in subdivision (1) separately for such goods sold to one or more motor vehicle producers; or

(1) calculating the total cost incurred with respect to all goods produced by the producer of the automotive good, subtracting any sales promotion, marketing and after-sales service costs, royalties, shipping and packing costs and nonallowable interest costs that are included in the total cost of all such goods, and then reasonably allocating the resulting net cost of those goods to the automotive good;
(2) calculating the total cost incurred with respect to all goods produced by that producer, reasonably allocating the total cost to the automotive good, and then subtracting any sales promotion, marketing and after-sales service costs, royalties, shipping and packing costs and nonallowable interest costs that are included in the portion of the total cost allocated to the automotive good; or
(3) reasonably allocating each cost that forms part of the total cost incurred with respect to the automotive good so that the aggregate of these costs does not include any sales promotion, marketing and after-sales service costs, royalties, shipping and packing costs or nonallowable interest costs.
(F) For purposes of this note, the term "class of motor vehicles" means any one of the following categories of motor vehicles:

(4) motor vehicles provided for in any of subheadings 8703.21 through 8703.90 , inclusive.
(G) For purposes of this note, the term "model line" means a group of motor vehicles having the same platform or model name.
(H) For purposes of this note, the term "nonallowable interest costs" means interest costs incurred by a producer that exceed 700 basis points above the applicable official interest rate for comparable maturities of the country in which the producer is located.
(I) For purposes of this note, the term "reasonably allocate" means to apportion in a manner that would be appropriate under generally accepted accounting principles.
$(\mathrm{J})$ For purposes of this note, the term "total cost" means all product costs, period costs and other costs for a good incurred in the territory of Peru, the United States, or both, and does not include profits that are earned by the producer, regardless of whether they are retained by the producer or paid out to other persons as dividends, or taxes paid on those profits, including capital gains taxes.

(g) Accessories, spare parts or tools.
(i) Subject to subdivision (g)(ii) and (g)(iii), accessories, spare parts or tools delivered with a good that form part of the good's standard accessories, spare parts or tools shall--

## Harmonized Tariff Schedule of the United States Revision 9 (2023)

(A) be treated as originating goods if the good is an originating good; and
(B) be disregarded in determining whether all the nonoriginating materials used in the production of the good undergo the applicable change in tariff classification set out in subdivision (n) of this note.
(ii) Subdivision (g)(i) shall apply only if--
(A) the accessories, spare parts or tools are classified with and not invoiced separately from the good, regardless of whether such accessories, spare parts or tools are specified or separately identified in the invoice for the good; and
(B) the quantities and value of the accessories, spare parts or tools are customary for the good.
(iii) If the good is subject to a regional value content requirement, the value of the accessories, spare parts or tools shall be taken into account as originating or nonoriginating materials, as the case may be, in calculating the regional value content of the good.
(h) Fungible goods and materials.
(i) A person claiming that a fungible good or fungible material is an originating good may base the claim either on the physical segregation of the fungible good or fungible material or by using an inventory management method with respect to the fungible good or fungible material. For purposes of this subdivision, the term "inventory management method" means:
(A) averaging,
(B) "last-in, first-out,"
(C) "first-in, first out," or
(D) any other method that is recognized in the generally accepted accounting principles of the country in which the production is performed (whether Peru or the United States) or otherwise accepted by that country.

The term "fungible good" or "fungible material" means a good or material, as the case may be, that is interchangeable with another good or material for commercial purposes and the properties of which are essentially identical to such other good or material.
(ii) A person selecting an inventory management method under subdivision (h)(i) for a particular fungible good or fungible material shall continue to use that method for that fungible good or fungible material throughout the fiscal year of such person.
(i) Packaging or packing materials and containers.
(i) For retail sale.--Packaging materials and containers in which a good is packaged for retail sale, if classified with the good, shall be disregarded in determining whether all the nonoriginating materials used in the production of the good undergo the applicable change in tariff classification set out in subdivision ( $n$ ) of this note, and, if the good is subject to a regional value content requirement, the value of such packaging materials and containers shall be taken into account as originating or nonoriginating materials, as the case may be, in calculating the regional value content of the good.
(ii) For shipment.--Packing materials and containers for shipment shall be disregarded in determining whether a good is an originating good.
(j) Indirect materials.

An indirect material shall be treated as an originating material for purposes of this note without regard to where it is produced. The term "indirect material" means a good used in the production, testing or inspection of another good but not physically incorporated into that other good, or a good used in the maintenance of buildings or the operation of equipment associated with the production of a good, including-
(i) fuel and energy;

## Harmonized Tariff Schedule of the United States Revision 9 (2023)

(ii) tools, dies and molds;

(v) gloves, glasses, footwear, clothing, safety equipment and supplies;
(vi) equipment, devices and supplies used for testing or inspecting the good;
(vii) catalysts and solvents; and
(viii) any other goods that are not incorporated into the other good but the use of which in the production of the other good can reasonably be demonstrated to be a part of that production.
(k) For the purposes of this note, the term "generally accepted accounting principles" means the recognized consensus or substantial authoritative support in the territory of Peru or the United States, as the case may be, with respect to the recording of revenues, expenses, costs, assets and liabilities, the disclosure of information and the preparation of financial statements. The principles may encompass broad guidelines of general application as well as detailed standards, practices and procedures.
(I) Claims for preferential tariff treatment; record-keeping requirements and verification.
(i) Claims for preferential tariff treatment.--An importer may make a claim for the tariff and other treatment provided for under the terms of this note based on either--
(A) a written or electronic certification by the importer, exporter or producer; or
(B) the importer's knowledge that the good is an originating good, including reasonable reliance on information in the importer's possession that the good is an originating good;
in such form and manner as may be required in applicable regulations.
(ii) Record-keeping requirements.--An importer of a good, for which entry is claimed under the terms of this note, shall maintain, for a minimum of five years from the date of importation of the good, all records and supporting documents necessary to demonstrate that the good qualified for the tariff and other treatment provided for under the terms of this note, in such form and manner as may be required in applicable regulations. For purposes of this note, the term "records and supporting documents" includes, with respect to an exported good for which entry is claimed under the terms of this note, records and documents related to the origin of the good, including--
(A) the purchase, cost and value of, and payment for, the good;
(B) the purchase, cost and value of, and payment for, all materials, including indirect materials, used in the production of the good; and
(C) the production of the good in the form in which it was exported.
(iii) Verification.--For purposes of determining whether a good imported into the customs territory of the United States from the territory of Peru qualifies as an originating good under the provisions of this note, the appropriate customs officer may conduct a verification as set forth in pertinent regulations.
(m) Interpretation and application of rules of origin.
(i) Unless otherwise provided herein, the requirements of any specific rule, or specific set of rules, in subdivision (n) of this note that is set out adjacent to a heading or subheading of the tariff schedule and specifies a change of tariff classification applies only to nonoriginating materials. For purposes of this subdivision and subdivision ( $n$ ) of this note, a tariff provision is a "heading" if its article description is not indented; a provision is a "subheading" if it is designated by 6 digits under the Harmonized Commodity Description and Coding System; and the terms "chapter" and "section" refer to a chapter or section, respectively, of the tariff schedule.
(ii) Where a specific rule in subdivision (n) of this note is defined using the criterion of a change in tariff classification, and the rule is written to exclude tariff provisions at the level of a chapter, heading or subheading of the tariff schedule, such rule shall be construed to require that materials classified in those excluded provisions be originating for the good to qualify as originating.
(iii) When a heading or subheading of the tariff schedule is subject to alternative specific rules in subdivision ( $n$ ) of this note, the rule will be considered to be met if a good satisfies one of the alternatives.
(iv) When a single rule is applicable to a group of headings or subheadings, and that rule of origin specifies a change of heading or subheading, the requirement shall be interpreted so that the change of heading or subheading may occur within a single heading or subheading or between headings or subheadings of the group. When, however, a rule refers to a change in heading or subheading "outside that group," such change in heading or subheading must occur from a heading or subheading that is outside the group of headings or subheadings set out in the rule.
(v) References to weight in the rules set forth in subdivision ( $n$ ) of this note for goods provided for in chapters 1 through 24 of the tariff schedule are to dry weight, unless otherwise specified in the tariff schedule.
(vi) For purposes of applying this note to goods of chapters 6 through 14, inclusive, agricultural and horticultural goods grown in the territory of a party shall be treated as an originating good even if grown from seeds, bulbs, rootstock, cuttings, grafts, shoots, buds or other live parts of plants imported from a non-party.
(vii) This subdivision confers origin on the goods specified in the provisions below, except as otherwise specified herein. Notwithstanding the preceding sentence, a good is originating if it meets the applicable change in tariff classification rules specified in subdivision ( n ) of this note.
(A) A good of chapters 27 through 40, inclusive (except ethyl isopropyl thionocarbamates of subheading 2930.20 and goods of heading 3823), of the tariff schedule, that is the product of a chemical reaction in the territory of Peru, the United States, or both, shall be treated as originating. For purposes of applying this subdivision to goods of the foregoing chapters, a "chemical reaction" is a process (including a biochemical process) that results in a molecule with a new structure by breaking intramolecular bonds and by forming new intramolecular bonds, or by altering the spatial arrangement of atoms in a molecule. The following are not considered to be chemical reactions for purposes of determining whether a good is originating:
(1) dissolution in water or in another solvent;
(2) the elimination of solvents, including solvent water; or
(3) the addition or elimination of water of crystallization.
(B) For the purposes of chapters 28 through 40, a good that is subject to purification shall be treated as originating provided that one of the following occurs in the territory of Peru, the United States, or both:
(1) the purification results in the elimination of 80 percent of the impurities; or
(2) the purification results in the reduction or elimination of impurities, rendering the good suitable:
(I) as a pharmaceutical, medicinal, cosmetic, veterinary or food grade substance;
(II) as a chemical product or reagent for analytical, diagnostic or laboratory uses;
(III) as an element or component for use in micro-elements;
(IV) for specialized optical uses;
(V) for non-toxic uses for health and safety;
(VI) for biotechnical use;
(VII) as a carrier used in a separation process; or

(C) A good of chapters 30, 31 or 33 through 40 (except heading 3808) shall be treated as an originating good if the deliberate and proportionally controlled mixing or blending (including dispersing) of materials to conform to predetermined specifications, resulting in the production of a good having physical or chemical characteristics that are relevant to the purposes or uses of the good and are different from the input materials, occurs in the territory of Peru, the United States, or both.
(D) A good of chapter 30, 31, 33 or 39 shall be treated as originating if the deliberate and controlled reduction in particle size of a good, including micronizing by dissolving a polymer and subsequent precipitation, other than by merely crushing or pressing, resulting in a good having a defined particle size, defined particle size distribution or defined surface area, which is relevant to the purposes of the resulting good and have different physical or chemical characteristics from the input materials occurs in the territory of Peru, the United States, or both
(E) A good of chapters 28 through 38 shall be treated as originating if the production of standards materials occurs in the territory of Peru, the United States, or both. The originating fibers and yarns referred to in subdivision $(A)(2)$ may contain up to 10 percent by weight of fibers or yarns that do not undergo an applicable change in tariff classification set out in subdivision ( $n$ ) of this note. Any elastomeric yarn contained in such originating yarns must be formed in the territory of Peru, the United States, or both.
(B) An apparel good of chapter 61 or 62 of the tariff schedule and imported under heading 9822.06 .20 of the tariff schedule shall be considered originating if it is cut or knit to shape, or both, and sewn or otherwise assembled in the territory of Peru, the United States, or both, and if the fabric of the outer shell, exclusive of collars and cuffs where applicable, is wholly of--
(1) one or more fabrics listed in U.S. note 29 to subchapter XXII of chapter 98; or

Any elastomeric yarn contained in an originating fabric or knit to shape component referred to in subdivision (B)(3) must be formed in the territory of Peru, the United States, or both.
(C) A textile good of chapter 42, 63 or 94 of the tariff schedule and imported under heading 9822.06 .20 of the tariff schedule shall be considered originating if it is cut or knit to shape, or both, and sewn or otherwise assembled in the territory of Peru, the United States, or both, and if the component that determines the tariff classification of the good is wholly of--
(1) one or more fabrics listed in U.S. note 29 to subchapter XXII of chapter 98; or
(2) one or more fabrics or knit to shape components formed in the territory of Peru, the United States, or both, from one or more of the yarns listed in U.S. note 29 to such subchapter XXII; or
(3) any combination of the fabrics referred to in subdivision (C)(1), the fabrics or knit to shape components referred to in subdivision $(\mathrm{C})(2)$ or one or more fabrics or knit to shape components originating under this note.
